Cleaning wastewater every day for a better Bay.

## Hilton Area Sewer Lining Project – Phase 1

HRSD, your regional wastewater treatment utility, is undertaking a project to rehabilitate approximately 8,200 linear feet of gravity sewer pipe, identified laterals, and manhole frames and covers originally installed in the greater Hilton area in the 1940s. This work, which is weather and situation dependent, is to take place primarily between the hours of **7 a.m. to 7 p.m**., **Monday through Friday** and is weather and situation dependent.

**The contractor continues the first phase of this effort by cleaning the sewer pipes and rehabilitating the main sewer line located in the street through manholes and cleanouts adjacent to homes and within the right of ways. There may be temporary interruptions to your sewer services while working near your home and we ask that you refrain from heavy water usage (such as washing clothes or using the dishwasher) during this time (7:00 a.m. to 5:00 p.m.). This work should not affect your water service.**

**Please allow enough room to access the cleanout in your yard and driveway (5 feet in either direction). These areas will be marked with orange cones the night before the work is to begin.**

**THIS WORK IS TENTATIVELY SCHEDULED TO BE PERFORMED ON:**

While our contractor and project team work diligently to minimize impacts, you may notice some odor as the construction crews accomplish their work. You may also hear noise associated with construction and heavy equipment, including back-up safety alarms. For your safety and that of the workers, please take care when traveling around the construction areas and **be aware of children in the school zones and the neighborhood.**

Please visit the HRSD website, www.hrsd.com, for updated project information. Look for the Construction Status link. Click on Newport News and then the Sewer Rehabilitation Project: Hilton Area Sewer Lining link.
