

Hampton Roads Sanitation District

Laskin Road Corridor Project Public Meeting

HRSD invites you to attend a public meeting to learn about a project to replace approximately 2.7 miles of its Hilltop / Point 'O Woods Interceptor Force Main. The existing underground pipelines, which are nearing the end of their useful life, convey the wastewater generated by area homes and businesses to HRSD treatment plants.

The project is designed in two sections. Section A is proposed to take place along the north side of Laskin Road between Great Neck Road and Village Drive. Section B would extend from the intersection of Laskin Road and Village Drive, cross Laskin Road, extend south along the west side of Victor Road, then along the south side of Donna Boulevard, cross First Colonial Road to Reynard Drive and end at Freemac Drive.

The Frequently Asked Questions on the back of this page provide more information about the project.

Come to the public meeting and:

- Meet with representatives of HRSD and our engineering consultant
- Hear an explanation of the proposed design for the project
- Ask questions
- Offer your input

Date: Wednesday, August 20, 2008
Time: 5:00 – 7:00 p.m.
Place: Linkhorn Park Elementary School
977 First Colonial Road
Virginia Beach, Virginia 23454

The mission of HRSD, your regional wastewater treatment utility, is to prevent pollution and protect public health.

PROJECT SCHEDULE:

Public Meeting
August 20, 2008

Design Completion
Late 2008

Construction
Early 2009 – Spring 2010

**IF YOU HAVE QUESTIONS,
CONCERNS OR COMMENTS
ABOUT THE PROJECT, PLEASE

Hampton Roads Sanitation District Laskin Road Corridor Project

Q: When will construction start and how long will it take?

A. Construction is likely to begin in both sections in early 2009, and end in spring 2010.

Q: Will the project affect traffic along Laskin Road?

A. HRSD is working closely with the City of Virginia Beach to develop a plan to minimize traffic impacts. At least one lane of westbound traffic will be maintained at all times. Appropriate signage, traffic control devices, and flagging operations will be provided. The eastbound travel lanes will not be affected.

Q: Will access to businesses be cut off at any time?

A. No. Access to businesses along the project alignment will be maintained at all times for patrons and service vehicles.

Q: What noise and dust impacts are anticipated?

A. As with any construction project, we anticipate routine noise generated by the operation of heavy equipment. During construction the contractor will be required to keep the roadways free of dirt and other debris, and to apply water to the site as needed to minimize dust.

Q: Why is this project needed?

A. The pipelines that are to be replaced were installed in 1965 and are nearing the end of their useful life. This project will provide updated infrastructure that will help ensure HRSD's ability to protect public health and the environment for decades to come.

Q: How much will it cost?

A. The estimated cost of Sections A and B combined is \$11.5 million.

Q: What alternative alignments were considered?

A. The firm of Michael Baker Jr., Inc., HRSD's engineering consultant for this project, prepared a comprehensive Preliminary Engineering Report. The document provides detailed information regarding the existing force main, regulatory and environmental permitting, pipeline design, pipeline alignment, and construction costs. If you would like to view a copy please call HRSD's Public Information Office at 757-460-7056.

Q: How may I learn more about the project?

A. HRSD is holding a public meeting on August 20, 2008 from 5:00 – 7:00 p.m. at the Linkhorn Park Elementary School to discuss the proposed improvements and solicit comments. If you are unable to attend you may call HRSD's Public Information Office at 757-460-7056 to obtain more information, to share your concerns, or to arrange to meet with staff. Project information is also available in the Project Updates section of HRSD's web site, www.hrsd.com. This information will be regularly updated during construction.
