Pipeline Replacement Project

Notice of Willingness to Hold a Second Public Meeting

HRSD will advertise in early 2009 for construction of a project to replace approximately 2.7 miles of underground pipeline in the Hilltop / Point O' Woods area. The pipeline, which is nearing the end of its useful life, conveys the wastewater generated by area homes and businesses to HRSD treatment plants.

HRSD hosted a public meeting on August 20, 2008, at Linkhorn Park Elementary School to explain the project and receive public comments. The final design is nearing completion. If you have questions or comments about this project, want to review the plans or desire to attend a second meeting to hear further discussion, please contact the HRSD Chief of Communications at 460-7056.

You can also visit the Project Updates page of HRSD's Web site (www.hrsd.com) to learn more about the project.
