

# DRAFT COMMISSION FINANCE COMMITTEE MEETING MINUTES April 23, 2024

The Committee Chair called the meeting to order at 11:23 a.m.

| Name                   | Title                | Present for Item Nos. |
|------------------------|----------------------|-----------------------|
| Taraski, Elizabeth     | Committee Chair      | 1-3                   |
| Levenston, Jr., Willie | Committee Vice-Chair | 1-3                   |
| Elofson, Frederick N.  | Committee Member     | Absent                |
| Glenn, Michael E.      | Commissioner         | Absent                |
| Lakdawala, Vishnu K.   | Commissioner         | 1-3                   |
| Rodriguez, Stephen C.  | Commission Chair     | 1-3                   |
| Stern, Nancy J.        | Commissioner         | 1-3                   |
| Templeman, Ann         | Commissioner         | 1-3                   |

#### 1. Approval of Minutes

The draft minutes of the March 26, 2024 Finance Committee meeting were distributed electronically prior to the meeting.

Moved:Willie Levenston, Jr.Ayes:2Seconded:Elizabeth TaraskiNays:0

#### 2. Internal Audit Review and Year Overview

Mr. Matthew Simons and Mr. Hayden Wigley from the SC&H Group presented the internal <u>audit update</u> including audit impact, audits in progress, the audit plan for Fiscal Year (FY) 2025, and management action plan progress. The following summarizes their activity:

#### **Completed Audits:**

- Family Medical Leave Act
- Grants Management
- Remote Access Network Security
- Risk Assessment FY-2024

#### **Audit in Progress:**

- Accounts Payable and ProCard
- Design and Construction Estimating
- Operational Technology Security and Resilience

#### DRAFT COMMISSION FINANCE COMMITTEE MEETING MINUTES April 23, 2024

#### **Upcoming Audits:**

- Billing, Accounts Receivable, and Aging
- IT Governance
- Personnel Investigations
- Risk Assessment Refresh

#### 3. FY-2025 Budget Review

Staff <u>presented</u> details on the FY-2025 budget, the FY-2025 to FY-2034 Capital Improvement Program (CIP), and proposed rate changes. The final budget will be presented to the Commission for approval at the May 28, 2024 meeting.

Staff distributed a <u>draft Rate Schedule</u> and draft Annual Budget during the meeting. The attached <u>draft Annual Budget</u> includes a corrected version of the Financial Forecast and agrees with the financial information presented by staff at the committee meeting.

agrees with the financial information presented by staff at the committee meeting.

Public Comment: None

Next Finance Committee Meeting Date: TBD October 2024

Meeting Adjourned: 12:09 p.m.

SUBMITTED: APPROVED:

# Family Medical Leave Act

## **Objectives**

- Evaluate current HRSD FMLA processes, policies, and procedures to ensure compliance with applicable FMLA laws, rules, and regulations for qualifying event notification and receipt, qualifying event evaluation and determination, and event record retention.
- Evaluate HRSD FMLA data between Oracle Enterprise Resource Planning (ERP) system and AdminEase (The Standards' platform for Short-Term Disability), and paper documentation to ensure accuracy and completeness for FMLA leave event entry, leave timekeeping, and leave calculations and monitoring.
- Evaluate current HRSD Sick Leave/Annual Leave, PTO, Short-term Disability and Leave
   Donation processes to ensure compliance with applicable HRSD policies and procedures.

# Family Medical Leave Act

### **Results**

- <u>Observation 1</u>: HRSD does not have FMLA procedural documentation outlining the required processes, tasks, and responsibilities for completing an FMLA leave event.
- Observation 2: HRSD FMLA data entry and review procedures were not consistently performed for FMLA leave events.

# **Design and Construction Estimating**

## **Project Summary**

### Goals:

- Confirm challenges that impact bid deltas.
- Offer opportunities to better understand and limit deltas.

<u>Planning</u>: Understand the bid creation process and identify preliminary challenges and opportunities to address them.

- Research
- Interviews
- Process flow diagrams
- Data analytics
- Director reporting

Action Items: Offer opportunities for HRSD to consider in efforts to limit/reduce estimate vs. bid deltas.

- <u>Data</u>: Analyze historic and present data points to understand contributing factors for deltas.
- Timing: Evaluate for opportunities to enhance future cost estimates, on both HRSD and 3rd party sides. Identify opportunities to reduce timing for all or certain components of the bids.
- Benchmarking: Understand how other organizations are managing and addressing price changes, lack of bidders, and market fluctuations.

# FY24, FY25 Internal Audit Plan

| Audit/Task                                | Department             | Period                     |

<sup>\*</sup>Extends beyond 10-year window

### SWIFT Phase 1 – Complies with Clean Water Act and Chesapeake Bay

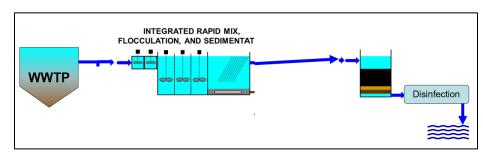

James River SWIFT + ANRI

Nansemond SWIFT + ANRI

Boat Harbor PS + FM

- Key Compliance Years = 2026 and 2032
- SWIFT Capacity = 50 MGD
- Aquifer Critical Cells Eliminated = 77%
- James River TN Reduction > 70%\*
- James River TP Reduction > 50%\*

VIP SWIFT Tertiary

### We are always researching ways to lower costs to keep our waterways clean

- HRSD's Integrated Plan = \$2.8B (\$ as of 2022)
- Without an Integrated Plan = \$7.8B
- Clean Water Act Compliance \$4.1B
  - Each Locality builds wet weather capacity = \$2.7B
  - HRSD builds wet weather capacity = \$1.4B
- Chesapeake Bay TMDL (Nutrient Reduction) \$3.7B
  - HRSD nutrient reduction plants = \$1.5B
  - Locality stormwater retrofits = \$2.2B

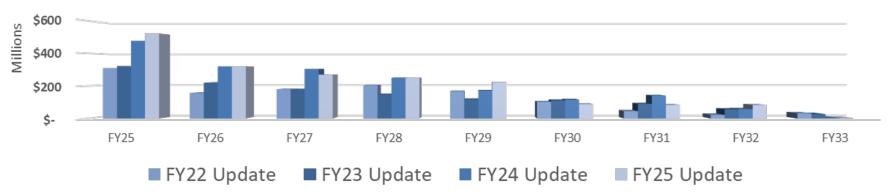

### HRSD saved the region \$5.0B\*

\*This does not include the value of sea-level rise mitigation, groundwater replenishment and protection from saltwater intrusion

### SWIFT Phase I Program + Boat Harbor = +\$0.6M

#### **SWIFT + Boat Harbor YOY Comparison**

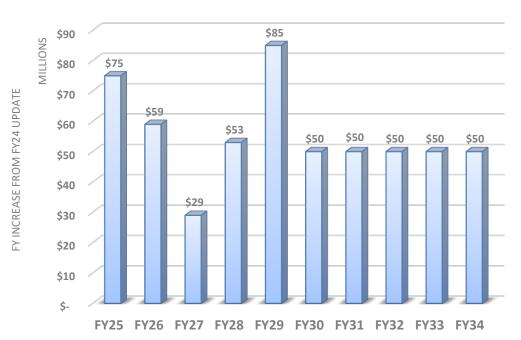

- SWIFT Costs are 51% of Total CIP FY25-FY32
- Program costs have stabilized
  - Nansemond SWIFT CCL received no significant budget modifications
- VIP Tertiary PER underway to determine scope of future VIP facility

#### Overall CIP Program Changes = +\$551M

#### FY25-FY34 Annual CIP Differential

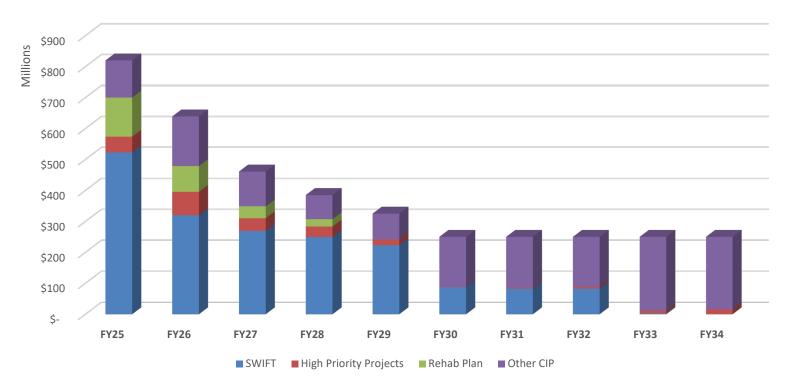

#### Drivers

- 30 New Projects
- Modified cost estimates to reflect current challenging bid environment
- Later year spending caps raised from \$200M to \$250M to account for inflation and initiation of climate resilience projects

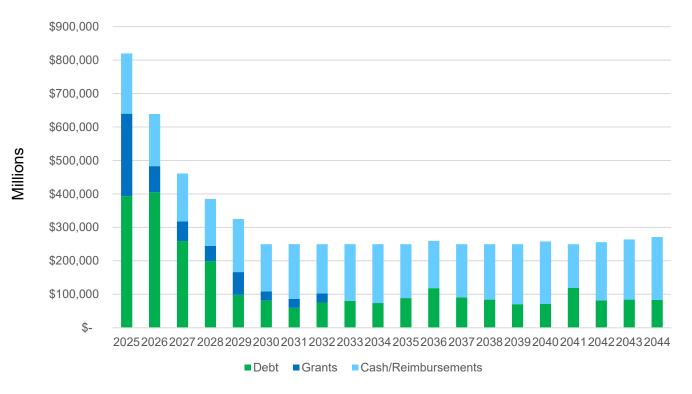

### FY25 - FY34 CIP = \$3.88B

#### Projected Annual Capital Spend – Sources of Funds

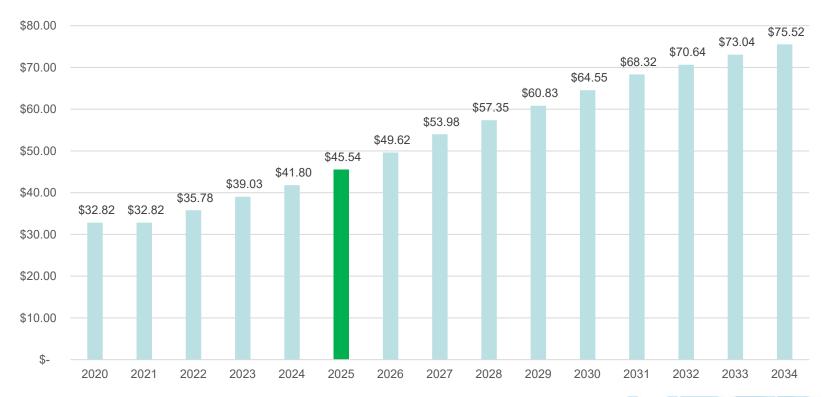

#### % Leveraged

- 5 Years (52%)
- 10 Years (45%)
- 20 Years (41%)

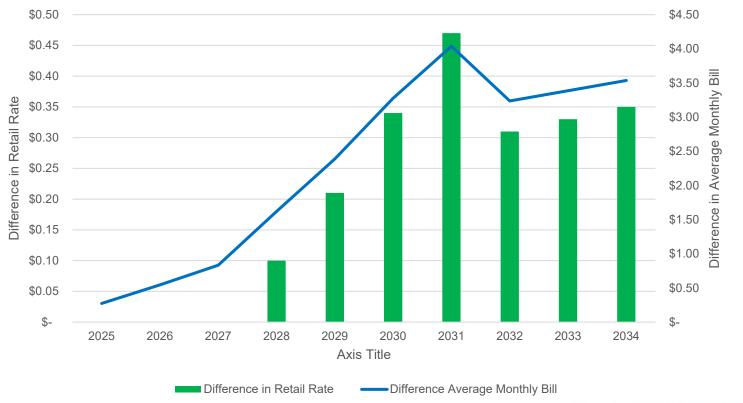

### Historical and Projected - Average Monthly Bill (5.5 ccf)

#### Changes to Projected Retail Rate from 2024 Financial Plan

## Financial Plan Risks/Unknowns – some within our control, some not

- WQIF grant availability
  - Qualified for over \$900M
- Water consumption declining or flat?
- CIP and SWIFT spend rates
  - Regulatory Deadlines
- Construction costs
  - Bid environment challenging

## Debt Service Coverage Ratio (DSCR)

## Debt Service Coverage Ratio

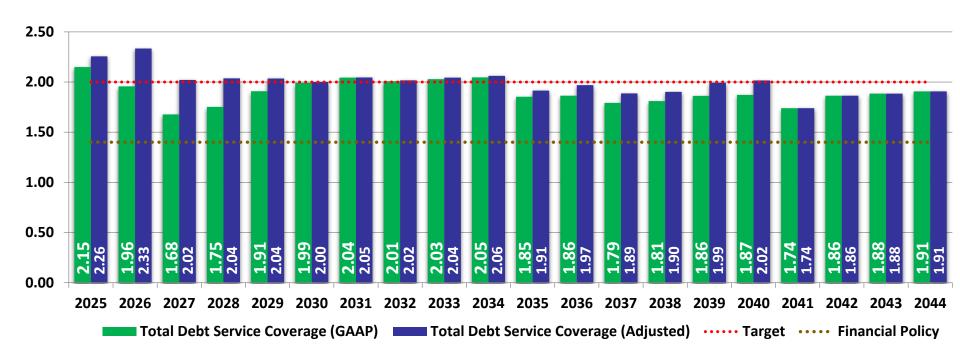

Principal + Interest

- How much income will you have to pay Debt Service (principal + interest)?
- Measure of sufficiency of revenues and rates to meet obligations
- Quantifies RISK Likelihood bond investors get paid back?

The forecast should target financial metrics, across the twenty-year period, that are consistent with rating agency metrics for a **strong, double-A rated credit**.

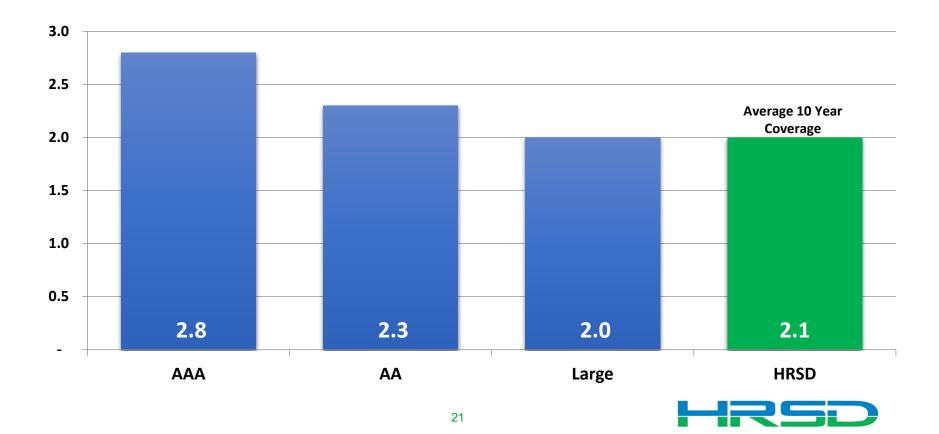

## **Total Debt Service Coverage Projection**

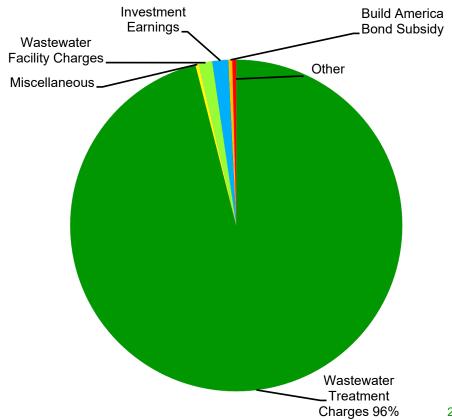

## Total Debt Service Coverage Median Comparison

## Rate/Revenue Discussion

## **Retail Rate**

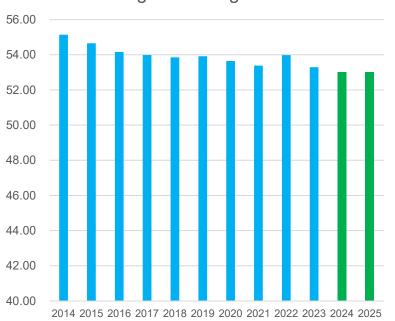

- FY25 \$8.28 per ccf
  - Avg monthly bill
    - \$45.54 (5.5 ccf)
    - +\$3.74/month
    - +\$0.12/day
    - Still \$0.01/gallon
- Flat Rate \$2.17/day
  - 12-month minimum requirement
- Wholesale Rate (unchanged)
  - \$3.55/1,000 gals
  - Towns with a population less than 2,000

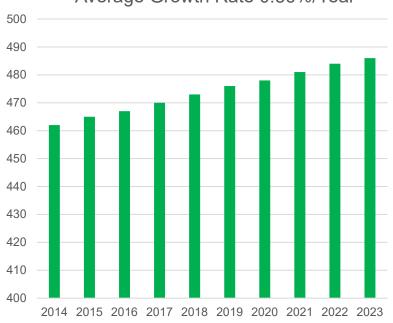

## Billed Consumption & Service Growth

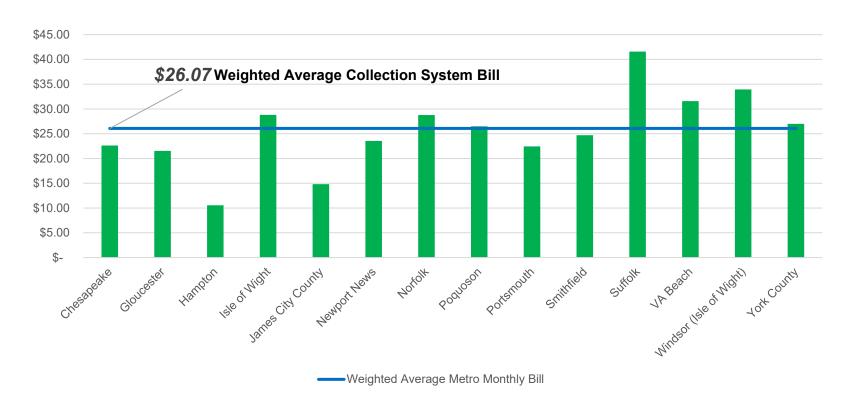

# Service Connections Average Growth Rate 0.56%/Year

## Average Metro Systems Monthly Bill (5.5 ccf)

## **Small Communities Rates**

|                                   |                |                     | Per 1,000 Gallons        |         |        |

| King William - Unmetered Accounts | \$2.17         | \$0.22              | \$0.03                   | \$2.42  | 7.8%   |

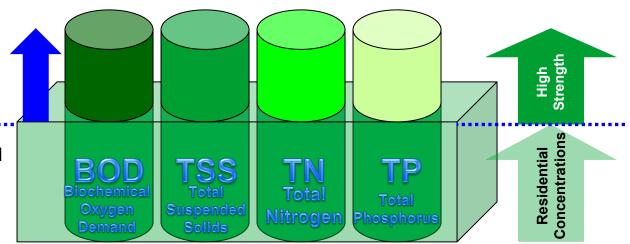

## Surcharges for High Strength or Unusual Wastes

- Domestic Quality Wastewater
- High Strength or Unusual Wastes
- \$1.4M (0.3% of total revenues)

• Decline by 12.5%

**Surcharge Rates represent Marginal/Incremental Costs** 

**BASE COST** includes Fixed and Variable Costs

## FY24 Proposed Surcharge Rates – Incorporates Moving Averages

 Cost based rates - 9-year average to dampen volatility

| FY24 Surcharge Rate per 100 lbs        |          |          | FY25 vs FY24    |              |
|--|----------|----------|-----------------|--------------|
| Pollutant                              | FY25     | FY24     | \$ Differential | % Difference |
| Biochemical Oxygen Demand (BOD)        | \$2.91   | \$2.96   | (\$0.05)        | -1.69%       |
| Total Suspended Solids ( <b>TSS</b> )  | \$9.82   | \$9.80   | \$0.02          | 0.20%        |
| Total Phosphorus ( <b>TP</b> )         | \$146.87 | \$148.30 | (\$1.43)        | -0.96%       |
| Total Kjeldahl Nitrogen ( <b>TKN</b> ) | \$45.94  | \$44.59  | \$1.35          | 3.03%        |

## Hauled Waste and Fats, Oils, and Grease (FOG) Rates

- Cost to treat Volume, BOD, TSS, TKN,
  - Excludes conveyance
- FOG costs significantly more to treat
  - 4-year average to dampen volatility

| FY24  |          | FY24 vs FY23 |                    |              |
|---|----------|--------------|--------------------|--------------|
| Hauled Waste Type                           | FY25     | FY24         | \$<br>Differential | % Difference |
| Mixed, Portable Toilet, Residential Septage | \$0.1812 | \$0.1812     | \$0.0000           | 0%           |
| Fats, Oils, Grease (FOG)                    | \$0.3658 | \$0.3517     | \$0.0141           | 4%           |

## Wastewater Facility Charges

- Covers the cost of the new development's share of the wastewater system's capacity
- Meters larger than 3 inches are rare (not including fire flow meters)

Net Replacement Value
HRSD's Plant Capacity

## Next steps

- May 28, Commission Meeting, vote on GM proposed budget
- Post rates for 4 consecutive weeks
- Budget effective July 1

# Questions?

### Rate Schedule Fiscal Year-2024 (July 1, 2024 – June 30, 2025)

1. WASTEWATER TREATMENT RATES (All customers except those in the Small Communities)

Accounts are billed either according to a water meter reading or, in the absence of a water meter, at a flat rate per day. A minimum rate of \$0.30 per day applies to all metered accounts.

Customers without a utility-owned water meter (typically well water customers) shall be billed according to their own water meter, which must be installed and maintained in accordance with the requirements of this Rate Schedule (except Flat Rate accounts).

a. Consumption-Based Accounts

These are accounts with water meters (wastewater charges are generally based on water meter readings)

**\$8.28 per 100 cubic feet** of water or a minimum of \$0.30 per day (whichever is greater)

b. Flat Rate Accounts (typically limited to Single Family Residential with 1-inch meters and smaller)

These are primary residence accounts without water meters or that use a significant amount of water not discharged to the sanitary sewer (irrigation, swimming pools, etc.)

\$2.17 per day

2. RATES – Small Communities

Small Communities include King William, Middlesex, Urbanna, Surry, West Point and the communities of Virginia's Eastern Shore.

| Total                                   | Wastewater Treatment |                |
|---|----------------------|----------------|
| a                                       | nd Collection Rate   | Flat Rate      |
| <u>Community</u>                        | per 1,000 gallons    | <u>per day</u> |
| Small Communities (except King William) | \$17.41              | \$2.39         |
| King William                            | 17.61                | 2.42           |

| Community         | Wastewater Treatment Rate<br>per 1,000 gallons | Flat Rate<br><u>per day</u> |
|-------------------|--|-----------------------------|
| Small Communities | \$11.07  | \$2.17                      |

A minimum rate of \$0.30 per day applies to all metered accounts.

#### **Unmetered Accounts**

Single Family Residential customers without a utility-owned water meter (typically well water customers) shall be billed a Flat Rate of \$2.39 per day.

All other customers, including commercial, government, professional, and multifamily customers without a utility-owned meter (typically well water customers) shall be billed a flat rate based on an Equivalent Residential Unit (ERU) basis. A schedule of fractions or multiples of the ERU is determined by HRSD based on the facility category. This schedule may be subject to verification or revision.

#### Cost per ERU per day

| Treatment and Collections | \$2.39 |
|---------------------------|--------|
| Treatment only            | \$2.17 |

| Unit Cost<br>per 1,000 gallons | ERU Usage<br>Rate |
|--------------------------------|-------------------|
| \$17.41                        | \$2.39            |
|                                |                   |

The amount billed to Mathews residential customers is a flat rate based on an Equivalent Residential water Usage (ERU) of 12,000 gallons per quarter. All others, including commercial, government and professional customers, are billed based on a schedule of fractions or multiples of the ERU as appropriate for each customer category. This schedule may be subject to verification or revision.

All other rates and fees in this Rate Schedule apply to Small Communities accounts when applicable.

#### 3. WASTEWATER TREATMENT AND COLLECTION RATES - Lawnes Point

For metered locations in the Lawnes Point subdivision of Isle of Wight County, accounts are billed the Sewer Rate published by Isle of Wight Public Utilities in addition to the Wastewater Treatment Rate listed in the afore mentioned section 1.

All other rates and fees in this Rate Schedule apply to accounts in the Lawnes Point subdivision in Isle of Wight County when applicable.

#### 4. TOWN WHOLESALE TREATMENT RATE

The Town Wholesale Treatment Rate is the rate paid by an incorporated town per specified unit of measure to recover the costs of conveyance and treatment of Domestic Quality Wastewater when the town does not use all HRSD facilities or need all services provided to a typical customer. This rate is only applicable to incorporated towns with a population less than 2,000.

Consumption per 1,000 gallons \$3.55

#### 5. DELINQUENCY AND RESTORATION SERVICE FEE

Each customer shall be billed a service fee of \$15.00 when HRSD provides warning of impending disconnection or disconnects such customer's meter because of non-payment of wastewater treatment or other delinquent charges or fees.

When any such services relating to the customer's meter are performed by the water supplier on behalf of HRSD, a fee to defray the charge imposed by the water supplier will be applied.

#### 6. METER REMOVAL FEE

When water service has been disconnected for non-payment and it becomes necessary to remove the meter, a fee to defray the charge imposed by the water supplier will be applied.

#### 7. DAMAGED LOCK FEE

When it becomes necessary to lock a meter, and the customer damages the lock or removes the lock in an attempt to resume water service, the customer will be billed a fee of \$100.00. HRSD will arrange for removal of the meter.

#### 8. DAMAGED METER/ANTENNA FEE

When it becomes necessary to replace a meter and/or antenna that the customer damaged, the customer will be billed a fee of \$250.00 plus the cost of the meter and/or antenna.

#### 9. INACCESSIBLE METER FEE

When it becomes necessary to access a meter and the customer deliberately blocks access to the meter, the customer will be billed a fee of \$50.00.

#### 10. SERVICE RESTORATION FEE

Customers who have made a sufficient payment following disconnection of water service and request to have service restored outside of standard restoration hours will be billed a fee of \$100.00.

#### 11. RETURNED PAYMENT FEE

A fee of \$25.00 will be billed each time a financial institution returns a customer's payment. This fee will be refunded upon receipt of satisfactory evidence the payment was returned solely due to the financial institution's error.

#### 12. ADVANCE SERVICE FEE

In cases of repeated delinquency, the customer will be required to pay an advance service fee. The amount will be based on the customer's previous 12-month billing history. Advance service fees will be refunded or automatically applied upon final billing. A customer whose account has not been delinquent for two years may apply in writing for a refund of an advance service fee.

#### 13. ACCOUNT DOCUMENTATION FEE

A fee of \$10.00 per account per 12-month period will be charged each time a customer requests account documentation.

#### 14. LATE PAYMENT CHARGE

All bills are due and payable when presented. When full payment is not posted to an account by the due date, a late payment charge of 1.5% of the past due amount will be assessed per month.

#### ACCESS CARD REPLACEMENT FEE

When it becomes necessary to replace an electronic access card for automated entry into a HRSD treatment plant or plants, the customer will be required to pay a fee of \$25.00 per card.

#### 16. METER READING FEE

In the event HRSD must directly obtain a meter reading due to customer's failure to submit required meter readings, the customer will be required to pay a fee of \$75.00.

#### 17. DEDUCTION METER FEE

A fee of \$2.00 will be assessed per deduction meter per month.

#### 18. PAYMENT PLAN

A courtesy payment plan may be available for customers temporarily having difficulty managing their bill. Customers approved for a payment plan must maintain eligibility requirements which include maintaining a current account and making timely scheduled payments without a history of late or returned payments.

#### 19. SERVICES RECEIVED WITHOUT BILLING

Wastewater treatment charges may be assessed for services received but not billed (for any reason) for a period of up to three prior years. The rate in effect in the year wastewater treatment services were provided will be applied. If necessary, at HRSD's sole discretion, payment plans may be established for payment of delayed billing or unbilled previous service.

#### 20. HIGH STRENGTH OR UNUSUAL WASTE

#### a. Surcharges

| = 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1      | <u>Type</u>  | In<br>Excess of      | Per mg/L<br>Per 100 CF | Per 10<br>pounds                   |
|--|--|----------------------|------------------------|------------------------------------|
| Total Phosphorus (TP) 7 mg/L* 0.009169 146.8 | Total Suspended Solids (TSS) Total Phosphorus (TP) | 282 mg/L*<br>7 mg/L* | 0.000613<br>0.009169   | \$ 2.91<br>9.82<br>146.87<br>45.94 |

<sup>\*</sup> Domestic Quality Wastewater

Unusual wastes not covered by this Rate Schedule will be considered separately and may be assigned a special rate.

#### b. Characterization

To determine the applicability of the surcharge, HRSD will assign an average concentration based on results obtained from similar businesses or may make an initial wastewater monitoring survey of the discharge. Based on business classification averages or survey results, HRSD will institute the surcharge. In cases of unusual wastes not covered by existing surcharge rates, HRSD may allow the customer to provide such tests and equipment needed to provide adequate basis for the surcharge. When wastewater discharge is subject to surcharge, the surcharge may be based on the normal characteristics of that waste. These will be determined from wastewater surveys of discharges from similar operations, wastewater surveys from the individual source, or from industrial, chemical, engineering or other appropriate reference.

#### c. Pretreatment

Wastewater discharge limitations may be imposed by HRSD to protect transmission and treatment structures or processes and to ensure compliance with federal and state effluent limitation guidelines. Pretreatment before discharge or elimination of the discharge may be required to meet the above guidelines, and/or all health standards as required by the Safe Drinking Water Act. It also may be necessary to remove any type of waste or alter any manner of discharge determined by HRSD to be detrimental to either transmission and treatment structures or processes.

#### d. Damage to Facilities

In the event either transmission or treatment structures or processes are damaged, or the flow through said structures or processes is hampered by a customer's wastewater discharge, HRSD may make or require to be made, at the customer's expense, such repairs as are necessary to restore transmission or treatment structures or processes to normal system operation.

#### 21. NUTRIENT CREDITS

| <u>Түре</u>            | Asset Charge<br>(\$/pound/year) | Operational Charge<br>(\$/pound) |
|------------------------|---------------------------------|----------------------------------|
| Total Suspended Solids | \$ 8.69                         | \$ 0.1241                        |
| Total Phosphorus (TP)  | 60.30                           | 1.1284                           |
| Total Nitrogen (TN)    | 13.91                           | 0.2893                           |

Nutrient Credit Rates are established to recover the marginal operational cost to treat pollutants and the capacity of assets consumed to treat the pollutants. HRSD, as provided in its Nutrient Credit Management Policy, may elect to sell these credits if it doesn't jeopardize compliance with its waste load allocation.

Generally, the Operational Charge is paid in advance every five years based on the then current rate. The charge will be reassessed every five years based on the rate in effect at the time of reassessment. On a case-by-case basis, intervals other than five years may be considered to support alignment with the credit recipient's permit cycle or needs.

Credits required to meet Virginia Pollutant Discharge Elimination System (VPDES) allocations must be paid annually.

#### 22. HAULED WASTEWATER (INDIRECT DISCHARGE WASTE)

| <u>Type</u>                  | Per Gallon |
|------------------------------|------------|
| Fats, Oils, and Grease (FOG) | \$0.3658   |
| Other Approved Hauled Wastes | \$0.1812   |

#### 23. FLAT RATE ACCOUNTS

Single family residential customers using a significant amount of water not discharged into the sanitary sewer system (typically irrigation systems or swimming pools) can establish a flat rate account with HRSD. The General Manager or Director of Finance may approve a flat rate account for water meters greater than 1-inch if the requester provides sufficient evidence there is a significant portion of water not discharged into the sanitary sewer system relative to average residential water consumption. Alternatively, these customers may have a separate water service installed by their local water provider solely for the uses that  $d\delta$  not discharge to the sanitary sewer. This separate

service will not be billed wastewater treatment charges by HRSD. Other local water charges may apply. Customers should check with their local water provider for details.

#### 24. CUSTOMER-OWNED METERS

#### a. Service Meters

- i. Meters must be purchased, permanently installed and maintained at the customer's expense.
- ii. The customer is required to provide HRSD a meter reading by the 10th day of each month. Charges will be based on this Rate Schedule. If a meter reading is not received by the 10th day of the month, HRSD will bill estimated wastewater treatment charges (and applicable surcharges) based upon consumption determined by HRSD. If the customer fails to provide a meter reading for a third consecutive month, HRSD will read the meter and calculate wastewater treatment charges (and applicable surcharges) based on consumption since the last actual meter reading, less consumption on the estimated billings. A meter reading fee will be assessed.
- iii. All meters installed are subject to periodic inspection and reading by HRSD personnel to ensure the accuracy of billings. Meters may be required, at the customer's expense, to be certified as accurate to manufacturer's specifications. A copy of the certification, if required, must be provided to HRSD. Meters installed after July 1, 1992, must be installed in such a manner as to provide one person access as defined in HRSD's Confined Space Entry Program.
- iv. Defective meters must be repaired or replaced at the customer's expense. Billing in the interim will be based on an estimate by HRSD. If necessary, an adjustment will be made based on six months of metered consumption using repaired or replaced meters.

#### b. Deduction Meters (sub-meters) (Amended 09/26/2023)

Existing commercial, industrial, multi-family residential customers with their own deduction meter installed and registered with HRSD prior to July 1, 2009, can meter their own water use not discharged to the sanitary sewer system. That meter information must be reported to HRSD for a reduction of billed consumption (wastewater treatment charges only). Failure to submit at least one deduction meter reading in a 12-month period will result in permanent termination of deduction meter credits for any single-family residential account. Customerowned deduction meters shall be installed, maintained, read and reported to HRSD as follows:

- i. To receive a reduction in wastewater treatment charges, the customer must provide a deduction meter reading to HRSD each billing period. Customers should submit their readings to HRSD five to seven days prior to their scheduled meter-read date to ensure the maximum deduction. The meter-read date can be found on the customer's bill and generally falls on or about the same day of the month for each billing cycle. Deduction meter readings submitted after the stated meter-read date will not be reflected for that billing cycle. If multiple deduction meter readings are submitted within the same bill period, the latest read will be used to calculate the credit.
- ii. After receiving the deduction meter reading HRSD will make the appropriate reduction in billed consumption, which will be reflected on the next bill. **Billed wastewater** treatment charges will not be reduced below the minimum charges per this Rate Schedule.
- iii. All installed meters are subject to HRSD's inspection and verification of submitted readings. HRSD may require meters be calibrated and their accuracy certified at the customer's expense. A copy of any required certification must be provided to HRSD. Meters installed after July 1, 1992, must be installed in a manner that provides one person access as defined in HRSD's Confined Space Entry Program.
- iv. Defective meters must be repaired or replaced at the customer's expense. Otherwise, no deduction will be allowed.

v. Installation of a meter must have complied with the local water jurisdiction's cross-connection control program (backflow prevention).

#### c. Non-Residential Account - Special Meter

For special situations, HRSD may require the installation of submeters and/or effluent meters if this is the most practical means of determining the Wastewater Treatment Charge. Installation and charges will be based on the requirements of this Rate Schedule.

#### 25. WASTEWATER FACILITY CHARGE

Wastewater facility charges cover the cost of treatment and conveyance capacity consumed by new connections, new development, or redevelopment resulting in increased wastewater volume or higher strength waste. Facility charges are applied to any sewer or sewer system discharging into HRSD facilities and any increase to existing service. For development occurring at a property previously connected to an existing sanitary sewer tap, the applicable facility charge will be waived for equivalent flow capacity. If a property previously served by a septic tank is connected to the sewer system, the applicable facility charge may be waived for equivalent flow capacity.

#### a. Volume-Based Facility Charges

These charges apply to all connections and are due and payable prior to the issuance of a building permit/sewer permit by the local jurisdiction. The facility charge shall also be due and payable prior to the renewal and/or reissuance of a building permit except in cases where the applicable facility charge was paid when the building permit was originally issued.

| Water Meter Size | Facility Charge |
|------------------|-----------------|
| 5/8-Inch         | \$ 2,430        |
| 3/4-Inch         | 4,210           |
| 1-Inch           | 7,410           |
| 1 ½-Inch         | 18,395          |
| 2-Inch           | 35,825          |
| 3-Inch           | 91,665          |
| 4-Inch           | 178,485         |
| 6-Inch           | 456,620         |
| 8-Inch           | 889,185         |
| 10-Inch          | 1,491,070       |
| 12-Inch          | 2,274,730       |
| 14-Inch          | 3,251,050       |
| 16-Inch          | 4,429,645       |

#### b. Special Exceptions

Where an expansion of existing facilities is planned, a facility charge will be paid for the difference in meter size.

In the case of a property use change (redevelopment), where the number and/or size of meters change, the facility charge will be computed based on the difference between the facility charge (at present rates) for the existing facility and the facility charge for the new facilities. In the case of redevelopment where neither the number nor size of meters change, there will be no facility charge required. No refund will be made for decreases in capacity.

Where service by a single master meter is changed to multiply individual meters, no utility charge will be required if aggregate usage remains unchanged.

When oversized water meters are used for fire service, to decrease pressure loss, to provide residential sprinkler systems or other unusual situations, the facility charge will be based on the meter normally sized for the service involved without these special considerations. The sizing required for service will be based on American Water Works Association (AWWA) flow requirements, certified by a Registered Professional Engineer or Architect and approved by HRSD.

When a significant quantity of metered water is not returned to the sewer, the facility charge will be based on one of the following:

- i. The size of the meter supplying water returned to the sewer.
- ii. The size of the meter supplying water minus the size of the customer-owned deduction meter, rounded up to the next available meter size. The deduction meter will be calculated in accordance with AWWA M22 Standards.
- iii. The appropriate water meter size (as determined by HRSD) if effluent metering is the only alternative.

If the usage pattern changes from that originally intended and more flow enters the sewer system, the facility charge will be increased accordingly.

When a water meter is not installed and the customer is connected to the sewer system, HRSD will use an ERU calculation to determine the comparable water meter size.

#### c. Refunds

Because of HRSD's certification and allocation of flow policies, payment of a facility charge will not assure connection to the system at the same cost after one year from date of issuance. The holder of a HRSD facility charge receipt, upon written request, will be eligible for refund when:

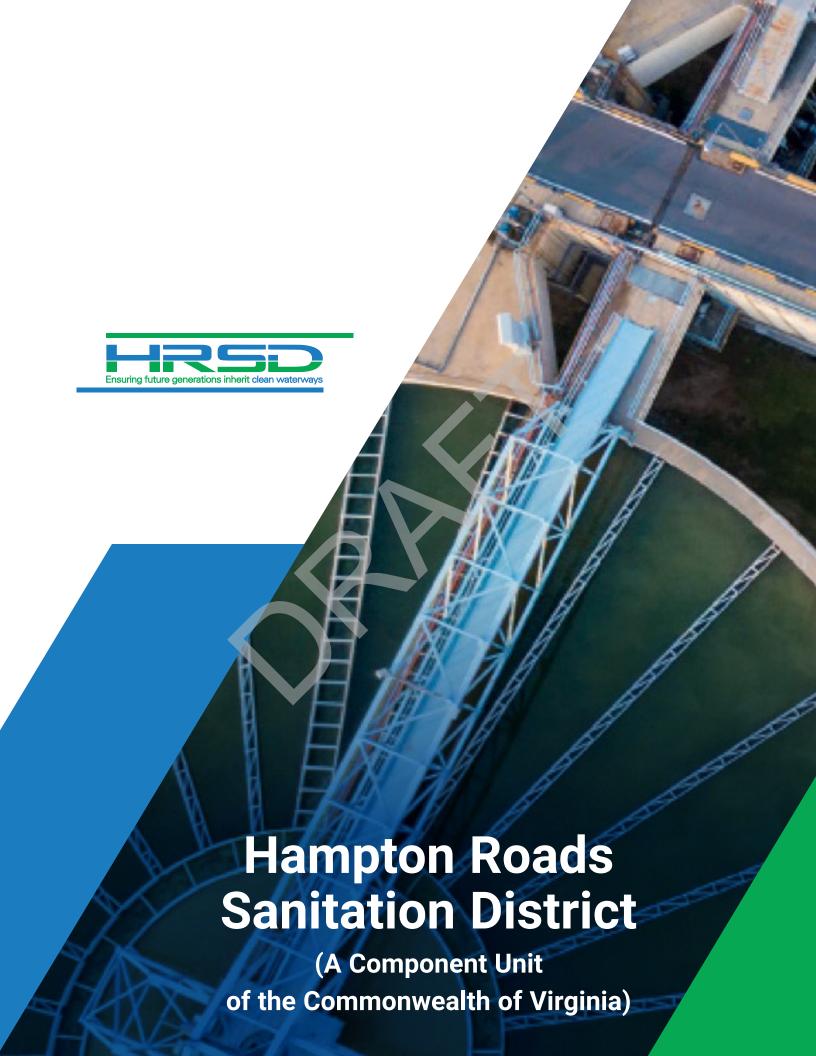

- i. Prior to construction, a change is made in the property which would result in a reduced facility charge.
- ii. Building permits are denied or canceled.
- iii. Construction has not or will not begin within one year from date of issuance.
- iv. The collection was made in error.

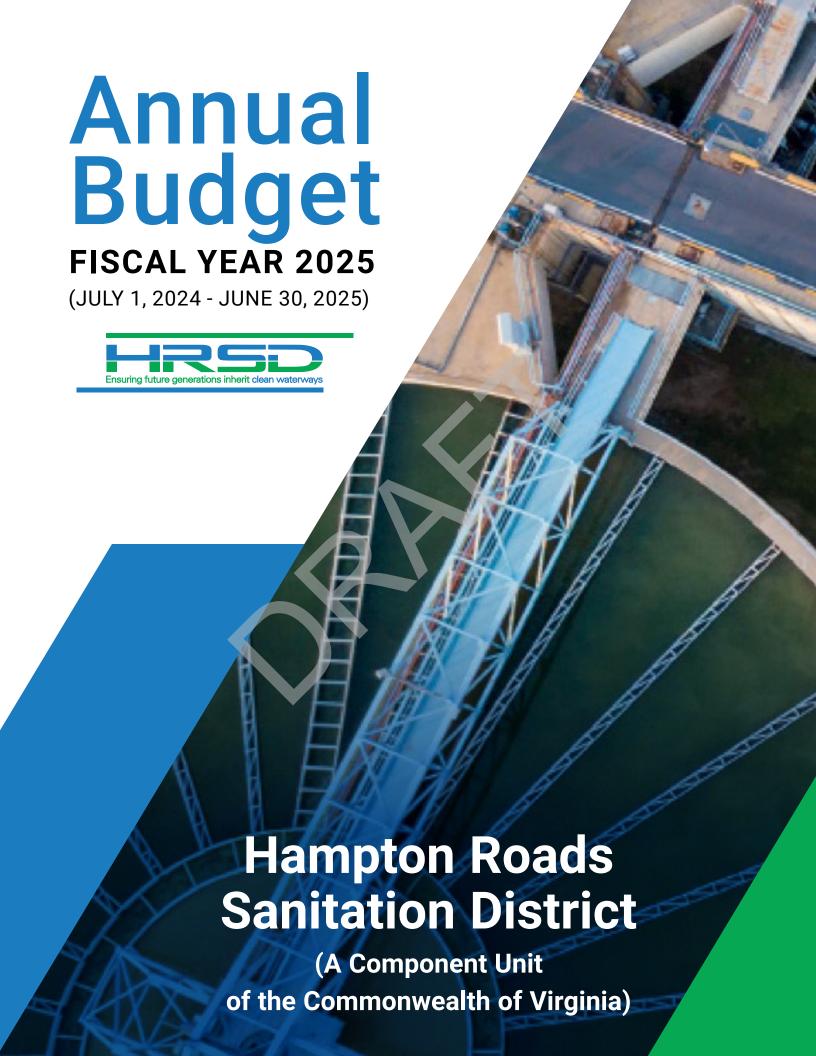

No refunds will be issued if HRSD has added treatment or conveyance capacity to the Regional Sanitary Sewer System as a result of the proposed construction prior to the request for a refund.

#### d. Unusual Situations

For unusual connections or where otherwise indicated, HRSD may make or require to be expense, such investigations as will provide adequate basis for determination of the facility charge.

INTRODUCTION FINANCIAL FORECAST OPERATING BUDGET CAPITAL BUDGET

#### **General Manager's Introduction**

The voters of Virginia took the bold step in 1940 to address pollution in the Hampton Roads by approving a referendum creating the Hampton Roads Sanitation District (HRSD). That public approval capped a 15-year grassroots campaign that began when the shell-fishing beds in the Hampton Roads were closed by the Virginia Department of Health. At the time, over 30 million gallons of untreated sewage was being dumped into the waters of the Hampton Roads each day. It would take the United States Congress another 32 years to tackle the issue of water pollution on a national scale, finally passing the Clean Water Act in 1972.

Over the past 84 years, HRSD has developed into one of the premier wastewater treatment organizations in the nation. With 14 treatment facilities capable of treating 226 million gallons of wastewater each day from twenty cities and counties, HRSD has eliminated the discharge of untreated sewage into the waters of coastal Virginia from the homes and businesses within our region. However, there is more work to be done to further improve water quality as well as preserve our continued investment in wastewater infrastructure.

The Governor-appointed, eight-member HRSD Commission approved this Fiscal Year 2025 budget at its regular meeting on May 28, 2024. The Commission and the HRSD staff worked diligently to balance our focus on stewardship of our ratepayers' hard-earned dollars with our promise of stewardship of the waters of the Hampton Roads. The cost of wastewater treatment continues to rise as historic inflation is impacting every sector of the economy. However, wastewater treatment is still a bargain in Hampton Roads, with the typical household paying about one-penny per gallon for this essential service that protects public health and our treasured local waterways.

#### Chesapeake Bay Restoration

The Chesapeake Bay is a national treasure as the nation's largest estuary but suffers from nutrient pollution from three major sources: agricultural runoff, stormwater and wastewater. With more than 18 million people living in the Chesapeake Bay watershed, wastewater is responsible for approximately 20 percent of the excess nutrients discharged into the Bay. Since 2006, HRSD has invested over \$500 million in new process technology improvements and millions in annual operating costs to meet increasingly stringent federally mandated nutrient reduction limits. Unfortunately, it is not enough. The Commonwealth of Virginia has focused its efforts on removing more nutrients from HRSD wastewater facilities to meet statewide commitments required in the upper portions of the Chesapeake Bay, and to offset delays in meeting nutrient reduction goals largely in unregulated sectors such as agriculture. As a result, the General Assembly in 2021 passed legislation creating the Enhanced Nutrient Removal Certainty Program. This legislative mandate commits HRSD to invest nearly \$2 billion in nutrient removal and related treatment upgrades, with a major portion of this work required to be completed by 2026. The remainder of the program must be completed by 2032. These projects, many of which HRSD planned to accomplish, are now critically needed over a more compressed timeline, reducing HRSD's flexibility in implementing the most cost-effective strategies and likely increasing the overall costs.

#### HRSD's Integrated Plan - Prioritized Investments to Address Hampton Roads Water Issues

The regional sewer system, although never designed to handle stormwater, fills with rainwater runoff, groundwater and tidal water during larger storms. When the regional system fills beyond its capacity, a sanitary sewer overflow (SSO) occurs onto local streets. As part of the Clean Water Act, the Environmental Protection Agency (EPA) has made minimizing these types of events a national priority; but it comes at a tremendous financial burden. SSOs in Hampton Roads are relatively rare, since the regional system has separate stormwater and sanitary sewer pipes, as opposed to a combined system that is common in larger cities. HRSD remains committed to eliminating SSOs; however, the impact of those transient events on local water quality is minimal and the benefits of their elimination is nearly unperceivable.

In 2014, as part of the EPA negotiations and to save the region money, HRSD and the cities and counties HRSD serves (collectively, Localities) agreed to a cooperative regional approach to increase the region's wet weather flow

capacity. Even though HRSD does not own the Localities' collection systems in the metropolitan region of Hampton Roads, HRSD agreed to make prioritized capacity-related improvements to its and the Localities' systems resulting in a significant reduction of overall program compliance costs.

More recently, the EPA has shifted to a more prioritized "one water" approach through their Integrated Planning framework. The Integrated Planning framework allows entities to "best prioritize capital investments and achieve our human health and water quality objectives." After years of negotiations with EPA and other key stakeholders, HRSD's Integrated Plan was approved on February 8, 2022. The plan was a collaborative effort between HRSD, EPA, the Virginia Department of Environmental Quality (DEQ) and the Localities that allows us to prioritize our region's most important water quality issues.

#### HRSD's SWIFT Program Offers Multiple Benefits and Saves the Region \$5 Billion

At the heart of the Integrated Plan is HRSD's Sustainable Water Initiative for Tomorrow (SWIFT) program. This program will take HRSD's already highly treated water that would otherwise be discharged into the James and Elizabeth rivers and further treat it to meet drinking water standards to be used to recharge the groundwater aquifer. SWIFT will help to:

Provide a sustainable source of groundwater

Slow the rate of land subsidence due to over withdrawal of the aquifer

Block saltwater intrusion by creating a pressurized freshwater barrier, and

Significantly reduce HRSD's nutrient discharges to the James and Elizabeth rivers.

As a result of the projected reduction in nutrients, HRSD established nutrient trading agreements with each Locality allowing them to collectively save over \$2 billion in required stormwater retrofits required by the end of 2025.

Given SWIFT's significant environmental benefits for the region, HRSD is prioritizing SWIFT construction efforts and implementing two phases of high priority wet weather projects in our Integrated Plan. The key regulatory requirements include:

\$99 million in improvements as part of our Rehabilitation Action Plan Phase 2 by 2025; current estimate is \$391 million.

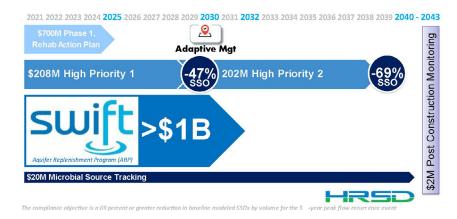

\$214 million of High Priority Wet Weather Projects from 2020 to 2030 to remove 47 percent of projected SSO volume; current estimate is \$238 million.

\$196 million of additional High Priority Wet Weather Projects from 2031 to 2040 to remove an additional 22 percent of SSO volume for a total reduction of 69 percent; current estimate is \$205 million.

Over \$1 billion spent on SWIFT through 2032; current estimate is \$2.6 billion, and

\$20 million in microbial source tracking through 2040.

INTRODUCTION FINANCIAL FORECAST OPERATING BUDGET CAPITAL BUDGET

HRSD's Integrated Plan not only complies with the Clean Water Act for SSOs, but also with nutrient reduction requirements for the Chesapeake Bay restoration. Between 2021 and 2028, over 70 percent of the total nitrogen and over 50 percent of the phosphorus will be eliminated from the Lower James River Basin.

In addition to helping to provide a sustainable groundwater supply, reducing the rate of land subsidence to lessen the effects of sea level rise in the region, protecting the aquifer from saltwater intrusion, and improving the health of the Chesapeake Bay, HRSD's regional approach to these regulatory requirements will save the region approximately \$5 billion as compared with each Locality individually being required to comply with the Clean Water Act and Chesapeake Bay nutrient reductions.

### Pursuing Innovative Solutions to Reduce Costs and Protect Water Quality

HRSD continues to lead international research efforts to reduce the cost of removing nutrients from wastewater and to intensify treatment processes. HRSD's research work is leveraged through partnerships with leading universities and other innovative wastewater utilities throughout the world. Putting the knowledge gained into practice has already yielded a significant return on our investment by reducing operating costs for nutrient removal, as well as minimizing the need for certain capital investments. These efforts have reduced HRSD's energy and chemical costs by nearly \$40 million over the past 10 years.

### Financing a Sustainable Water Future

HRSD is investing in the regional wastewater infrastructure to ensure we leave a fully functional system to the next generation. While HRSD continues to focus on making the right investments at the right time in Hampton Roads, across the nation the need for investment in all infrastructure continues to grow. The <u>American Society of Civil Engineers' 2021 Infrastructure Report Card</u> graded the current state of wastewater infrastructure at a D+. <u>The US Water Alliance's Report, The Economic Benefits of Investing in Water Infrastructure</u>, estimates the unmet water investment at over \$81 billion per year. The report highlights the lack of adequate federal investment in wastewater infrastructure, showing the drop in federal investment from 63 percent in 1977 to less than 4 percent in 2017. State, regional and local governments have had to fill that funding gap, passing on significant rate increases as utilities must price service to recover full costs.

## HAMPTON

With 76 percent of HRSD's \$2.8 billion five-year CIP necessitated by changing environmental regulations, HRSD must continue to raise its rates. To lower costs to its ratepayers, HRSD seeks the lowest cost of capital to finance its infrastructure requirements. HRSD is the largest borrower in the Commonwealth of Virginia Clean Water Revolving Loan Funds (VCWRLF) issued by the DEQ and the Virginia Resources Authority. VCWRLF is a federally subsidized program that offers up to a 1.5 percent interest rate subsidy for 20-year loans. HRSD also secured \$1.05 billion in federally subsidized Water Infrastructure Finance and Innovation Act (WIFIA) programmatic loans for SWIFT. Approximately, \$700 million of those loans have a locked-in interest rate of 1.78 percent. These strategies, when compared to current market rates, will save our ratepayers over \$600 million. HRSD is also actively applying for Virginia Water Quality Improvement Fund (WQIF) grants to help fund the required nutrient reduction projects, but funds are dependent on General Assembly appropriations.

### The Community's Role

Our ratepayers can help control their costs by helping us control ours. Ensuring storm water runoff from downspouts, area drains, and sump pumps is not directed to the sanitary sewer system, and ensuring privately-owned service piping is well maintained and leak free will reduce the amount of extraneous water entering the sewer system. Collecting fats, oils and grease in a container for disposal in the trash, as opposed to pouring them down the drain, reduces wastewater system maintenance and operating costs. Proper disposal of unused medications (and other substances) prevents them from reaching our treatment plants, which are not designed for removal of such substances. Our ratepayers can make a difference by not flushing unused medications down the sink or the toilet and avoid using "flushable" wipes as they do not break down and clog our system. Every flush counts.

As we reflect on nearly 84 years of protecting public health and the waters of Hampton Roads, we remember the mandate so boldly declared by those environmentally concerned Virginians in 1940. It was their foresight that allows us to enjoy the waters of Hampton Roads today. It will take our continued innovation, investment and foresight to ensure future generations will inherit clean waterways and be able to keep them clean.

Jay A. Bernas, PE General Manager

## **HRSD Service Area**

## **HRSD Organization Chart**

## **History of HRSD**

HRSD can trace its beginnings to 1925 when the Virginia Department of Health condemned a large oyster producing area in Hampton Roads. The closure resulted in the Virginia General Assembly creating in 1927 a "Commission to Investigate and Survey the Seafood Industry of Virginia." Other studies recommended a public body to construct and operate a sewage system in the area. HRSD was named after Hampton Roads, a ship anchorage used for five centuries located near the convergence of the James, Elizabeth and Nansemond Rivers, before they flow into the Chesapeake Bay in southeastern Virginia.

In 1934, the Virginia General Assembly created the Hampton Roads Sanitation Disposal Commission with instructions to plan the elimination of pollution in Hampton Roads. Recommendations were made to the General Assembly, which resulted in the Sanitary Districts Law of 1938, along with "an Act to provide for and create the Hampton Roads Sanitation District." This Act required the qualified voters within HRSD to decide in a general election on November 8, 1938, if they favored creation of such a District. This referendum failed to gain a majority by about 500 votes out of nearly 20,000 votes cast. This led to a revision of the Act and another referendum was held on November 5, 1940, which resulted in a majority vote for the creation of the Hampton Roads Sanitation District.

The Enabling Act provides for HRSD to operate as a political subdivision of the Commonwealth of Virginia for the specific purpose of water pollution abatement in Hampton Roads by providing a system of interceptor mains and wastewater treatment plants. Its affairs are controlled by a Commission of eight members appointed by the Governor for four-year terms. Administration is under the direction of a General Manager, supported by department directors and their staffs.

HRSD began operations on July 1, 1946, using facilities acquired from the United States Government. The Warwick County Trunk Sewer, HRSD's first construction project, began on June 26, 1946, and was funded by HRSD's \$6.5 million Primary Pledge Sewer Revenue Bonds, dated March 1, 1946. The first treatment plant, the Army Base Plant, began operation on October 14, 1947. Since that time, the facilities of HRSD have grown to provide sanitary sewer service to all major population centers in southeastern Virginia. The population served has increased from nearly 288,000 in 1940 to about 1.9 million in 2023.

Throughout its rich history HRSD has earned many of its industry's most prestigious awards. This tradition continued as HRSD received the Water Resources Utility of the Future Today award from the Water Environment Federation as well as the Virginia Municipal League Innovation Award with locality partner, York County, for the first full-scale deammonification plant in the world and HRSD's patented Partial Denitrification Anammox (PdNA) process at York Treatment Plant.

Additional awards and honors received during the year ended June 30, 2024 include the 2024 National Association of Clean Water Agencies National Environmental Achievement Award in the Public Information and Education Video Category for its "National Infrastructure Week: James River Treatment Plant SWIFT Improvements" video. The HRSD Finance Department also earned the George F. Ames PISCES award in the Innovative Finance category from the Environmental Protection Agency (EPA).

## Reader's Guide to the Annual Budget

### **PURPOSE**

The Annual Budget is an instrument that sets HRSD's budgetary policy and authorization to raise revenues and spend funds each fiscal year. The development of the Annual Budget is guided by HRSD's promise and vision statements:

- Promise: We promise to treat wastewater and recover natural resources to protect public health and the environment.
- Vision: Our communities will have clean waterways and reliable water resources for generations to come.

### ANNUAL BUDGET OVERVIEW

HRSD's Annual Budget contains the following sections:

#### Financial Forecast

This section provides a high level, 20-year forecast of projected wastewater treatment rate increases, operating revenues and expenses, capital improvements and related funding sources, amounts contributed to and fiscal year-end balances of cash and investment reserves, and selected financial ratios that help to measure the financial health of HRSD. The forecast is an inflationary based model where trends from past fiscal years and proposed operating budgets are used to forecast future operating needs. Transfers to reserves and to the Capital budget are forecast to be in amounts that are not less than parameters established within HRSD's Financial Policy. Debt service is based on different sources of future funding: Virginia Clean Water Revolving Fund, Water Infrustructure Finance and Innovation Act (WIFIA), interim financing and revenue bonds. Interest rates are based on known rates or historical averages.

### **Operating Budget**

The Operating Budget represents the authorization by the HRSD Commission to spend funds directly related to operating and maintaining HRSD's programs and assets during the fiscal year. This section includes each department's annual operating budgets. Those expenses that are not attributable to a specific department are assigned to "General Expenses." Transfers represent authorization to transfer revenues raised from operations to either the Capital Budget or to various reserves established in HRSD's Financial Policy. The Operating Budget Summary provides the budget by department and major object code classification. Department Budgets and General Expenses, Debt Service and Transfers detail budget expenditures by major object code classification. The number of full-time positions authorized for the fiscal year is provided by department.

### **Capital Budget**

The Capital Budget represents a plan of specific, major capital improvements over a period of ten fiscal years. The Capital Budget is not an approval or appropriation of funds for individual projects. There is no authorization or funding for individual projects until the Commission acts on the specific project. The Commission formally authorizes spending for individual projects throughout a fiscal year and generally upon project initiation.

The Summary Schedule details the funding sources for capital improvements as well as planned expenditures.

A formal, detailed, Capital Improvement Program with more specific project information is available at <a href="https://www.hrsd.com/cip">https://www.hrsd.com/cip</a>.

HRSD's budget authorizations, capital improvement plans, user rate setting practices and other significant financial practices are guided by HRSD's Financial Policy and Revenue Policy. The Financial Policy and Revenue Policy are available at <a href="http://www.hrsd.com/finance">http://www.hrsd.com/finance</a>.

HRSD's Rate Schedule is available at http://www.hrsd.com/finance.

INTRODUCTION FINANCIAL FORECAST OPERATING BUDGET CAPITAL BUDGET

### **BUDGETARY PROCESS**

HRSD prepares its Annual Budget under the provisions of its enabling legislation and its Trust Agreement, dated March 1, 2008. In accordance with those provisions, the following process is used to adopt the Annual Budget:

- The process begins in late December with the issuance of the Annual Budget Instructions by the General Manager. Each department completes its Operating Budget by March 1 for the General Manager's review.
- The HRSD Commission appoints a Finance Committee which typically consists of two Commissioners. The
  committee meets in early April to review the budgets. The Commission reviews these budgets during its
  April meeting.
- The final Annual Budget, which incorporates the Operating and Capital Budgets, is presented at the May Commission meeting for adoption. The Commission simultaneously adopts the budget and any resulting wastewater rate schedule changes. All rate adjustments must be publically advertised four consecutive weeks before they can take effect.
- The HRSD Commission approves any budget amendments during the fiscal year.

### **BUDGETARY ACCOUNTING AND CONTROL**

HRSD operates in accordance with annual operating and capital budgets prepared on a basis of accounting that is different from generally accepted accounting principles.

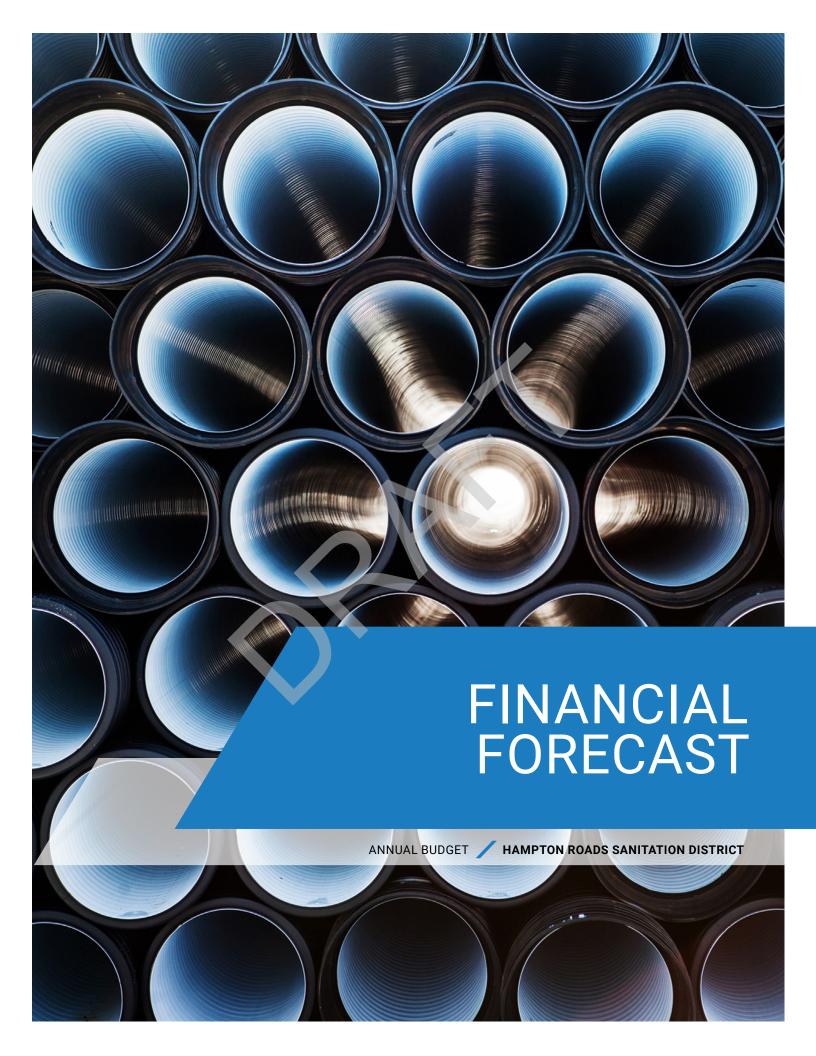

The Operating Budget is adopted by department, with budgetary controls exercised administratively by management at the department level. The General Manager is authorized to transfer funds among departments without further approval by the Commission. Appropriations lapse at the end of the fiscal year. Valid, outstanding encumbrances (those for which performance under a contract is expected in the next year) are re-appropriated without further approval by the Commission and become part of the subsequent year's budget.

The Capital Budget represents a ten-year plan. Funds for the Capital Budget are adopted throughout a fiscal year on a project basis. Transfers among projects require approval by the Commission. Appropriations for these budgets continue until the purpose of the appropriation has been fulfilled.

## **Glossary of Financial Terms**

- Adjusted Days Cash on Hand: Days Cash on Hand that excludes accrued debt service, the Risk Reserve, the Renewal and Replacement Reserve, and cash budgeted for the CIP in the next fiscal year.
- **Appropriation:** An authorization granted by the Commission to incur obligations for specific purposes. Appropriations are usually limited to amount, purpose and time.
- Basis of Accounting: HRSD's financial statements report the financial position and results of operations of HRSD in accordance with generally accepted accounting principles in the United States of America (GAAP).
- Bond Ratings: A grade given to bonds that represents a measure of their credit quality. Private independent rating services such as Standard & Poor's, Moody's and Fitch provide these evaluations of a bond issuer's financial strength, or its the ability to pay a bond's principal and interest in a timely fashion.
- Capital Improvement Program (CIP): Ten-year plan for major non-recurring facility, infrastructure, or acquisition expenditures that expand or improve HRSD and/or locality assets. Projects included in the CIP include physical descriptions, implementation schedules, year of expenditure cost and funding source estimates, and an indication of HRSD Commission priorities and community benefits Centum Cubic Feet (CCF): Typical unit in which industrial-consumption of natural gas or water is measured; each CCF being 100 cubic-feet.
- CIP Percent Cash Funded: Percent of each year's capital improvement plan funded with cash through transfers from operations. HRSD's Financial Policy requires that at least 15 percent of each year's planned capital improvements be funded with cash. This ratio indicates the amount of capital improvements that are not leveraged.
- Days Cash on Hand: Measured by current and noncurrent unrestricted cash and investments, plus any restricted cash and investments, if available for general system purposes, divided by Operating Expenses, divided by 365.
- **Debt Service:** Amount of money necessary to pay principal and interest on bonds outstanding.
- Debt Service as a Percent of Revenues: Total revenues divided by total debt service. This ratio measures the debt service burden compared to total revenues.

- Risk Management Reserve: HRSD maintains a selfinsurance program for some of its risk exposures. HRSD'S Financial Policy requires HRSD to maintain a Risk Management Reserve as of the end of the fiscal year of not less than 25 percent of projected annual self-insured claims costs for known, retained risks.
- Senior Debt Service Coverage: Current-year revenues available for debt service divided by current-year senior lien debt service. This ratio indicates the financial margin to meet current senior lien debt service with current revenues available. HRSD's Financial Policy requires that Senior Debt Service Coverage will not be less than 1.5 times senior lien debt service. When calculating compliance with this coverage requirement, HRSD may make reasonable adjustments to the net revenues as presented on a basis consistent with generally accepted accounting principles. HRSD's Senior Trust Agreement requires Senior Debt Service Coverage, which is determined by dividing the Income Available for Debt Service by the Maximum Annual Debt Service, will not be less than 1.2 times.
- Total Debt Service (Adjusted): Calculated in accordance with HRSD's Subordinate Trust Agreement, the ratio determined by dividing the Net Revenues by annual debt service. In such calculation, funds spent on Locality Assets may be excluded from the calculation of Net Revenues under the circumstances described within the definitions of Net Revenues and Operating Expenses. Annual debt service will be based on actual principal and interest payments during the year (i.e., not accrual based).
- Total Debt Service Coverage Ratio (GAAP): Calculated in accordance with HRSD's Senior Trust Agreement, the ratio determined by dividing the Net Revenues by annual debt service. In such calculation, funds spent on Locality Assets are considered an expense. Annual debt service will be based on actual principal and interest payments during the year (i.e., not accrual based).
- **Trust Agreement:** The formal agreement between bond holders, acting through a trustee, and HRSD.
- **Unrestricted Cash:** Unrestricted cash and investments at fiscal year-end that are not earmarked for another purpose.

### **Finance**

The Finance Division is responsible for HRSD's general financial and business functions, including financial reporting, investment portfolio, debt and risk management and customer billing. The Accounting Department handles fiscal affairs such as preparing statements, budgets, management reports and payroll. The Customer Care Center Department handles billing, payments, collections, maintenance of customer accounts and liaison with HRSD's customers. The Digital Water Department creates innovative strategies to help HRSD save on chemical and energy costs; minimize the potential for environmental harm; make smart financial decisions regarding capital improvement and asset management; and streamline and facilitate frontline operations to automate what can and should be automated. The Financial Analytics and Data Systems Department is responsible for planning and financing the Capital Improvement Program, debt management and compliance, and is the functional lead for the Enterprise Resource Process system. The Procurement Department is responsible for purchasing, renting, leasing or otherwise acquiring goods, professional and non-professional services, and certain construction services, managing supplier relationships and disposing of surplus property.

## **Information Technology**

The Information Technology Division is responsible for HRSD's computer systems, communication systems, network systems, cyber security and data management functions. The Information Technology Operations Department assists HRSD Divisions in achieving their missions by ensuring all required hardware, storage and network devices are accessible and available to support all business and operational requirements. The Enterprise Application Services Department is responsible for data management, storage and all software supporting HRSD operations. Cybersecurity Department personnel are responsible for programming industrial controls, automation at HRSD operation facilities, and evaluating and eliminating cyber security threats.

## **Operations**

The Operations Division is responsible for operating and maintaining HRSD's treatment plants, pump stations, pipelines, buildings and equipment. HRSD provides wastewater treatment services for over 1.9 million people in 20 cities, counties and towns. The Treatment Plant Departments include 9 wastewater treatment plants in the Hampton Roads service area. Services to small communities that are in the HRSD service area are provided by the Small Communities Department (SCD). The SCD operates four smaller treatment plants and the associated sewer collection systems for four counties on the Middle Peninsula and the Town of West Point. The SCD also includes the operation of two treatment plants and the associated sewer collection systems in the County of Surry. Finally, the SCD operates two treatment plants and the associated sewer collection services for the Towns of Chincoteague and Onancock on the Eastern Shore of Virginia. The Electrical and Instrumentation Department supports the electrical and instrumentation maintenance and construction needs of all HRSD facilities as well as programming industrial controls and automation at HRSD facilities. The Interceptor Departments operate and maintain over 500 miles of interceptor pipelines and over 100 pump stations ensuring wastewater is conveyed to each treatment plant. The Support Systems Department is responsible for the maintenance of the HRSD fleet, all buildings, operation of two carpentry shops, a full-service machine shop and managing an infrastructure assessment team. This Department is also responsible for energy management and research to find innovative, cost-effective ways of managing our energy consumption more effectively. This Division also the Technology Division whose primary purpose is to research new technologies with a focus on rapid deployment of innovative solutions and water quality.

## **Operations (Continued)**

## **Engineering**

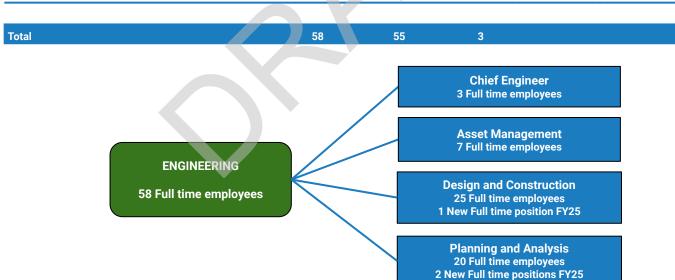

The Engineering Division is responsible for facility planning, design and construction and related support. The Asset Management Department is responsible for the Computerized Maintenance Management System (CMMS), Condition Assessment, and Emergency Management procedures to extend the life of assets at the lowest life cycle cost. The Design and Construction Departments deliver capital projects in a manner consistent with HRSD's quality standards. The Planning and Analysis Department manages numerous diverse functions including Hydraulic Modeling, Geographic Information System (GIS), Data Analysis and Records Management System and plans the capital infrastructure required to meet the region's future wastewater needs. The division is also responsible for all property and land acquisition to meet the needs of HRSD.

## **Water Quality**

The Water Quality (WQ) Division's mission is to provide quality environmental services to support HRSD and its partners. This division helps ensure compliance with HRSD environmental permits and leads regulatory advocacy through the work of three divisions. The Central Environmental Laboratory (CEL) Department uses the Environmental Data Management System (EDMS) and other tools to provide analytical support for numerous monitoring, research and regulatory purposes. The Pretreatment and Pollution Prevention (P3) Department monitors wastewater conveyed to treatment plants using the Pretreatment Information Management System (PIMS) and other tools, and implements its Industrial Wastewater Discharge Regulations to protect treatment plant staff, facilities and processes. The Technical Services Department (TSD) is responsible for activities including environmental monitoring, specialized sampling, treatment process and research studies, the Municipal Assistance Program (MAP) to assist localities, as well as all reporting required by HRSD permits.

## **General Expenses, Debt Service and Transfers**

General Expenses includes operating expenditures not assigned to any specific HRSD Division. Debt Service includes payments on bonds issued by HRSD, Virginia Clean Water Revolving Loan Fund (VCWRLF), Water Infrastructure Finance and Innovation Act (WIFIA), and Bank of America Line of Credit. Transfers are made to fund the Capital Improvement Program (CIP) and the Risk Management reserve. The costs incurred to issue bonds are included in General Expenses - Miscellaneous.

## THIS PAGE INTENTIONALLY BLANK

## **Capital Budget**

HRSD prepares a Capital Improvement Program (CIP) each year for the capital projects currently underway or proposed for the future. The first year of the CIP is authorized as the Capital Budget for FY-2025 in the amount of \$820 million.. The remaining years (FY-2026 to FY-2034) include all known projects planned for these years; however, approval of the plan does not authorize the Capital Budgets for those years. Each year's Capital Budget will be approved during the budget process for the specific year.

The ten-year Capital Improvement Program for FY-2025 to FY-2034 highlights the anticipated cost of each project and the fiscal year(s) in which the work is expected to occur. All costs listed in the CIP are stated in current year dollars and total approximately \$4.1 billion.

The bond component of the plan may include one or all of the following:

- Interim or construction financings
- Federally subsidized borrowing programs administered by the Virginia Resource Authority and the Environmental Protection Agency
- HRSD Revenue Bonds or Notes

The grant component represents funds estimated to be received from a federal or state agency for specific projects. Other reimbursements, if any, include amounts paid by other parties who may participate in a project. The following abbreviations are used throughout the CIP budget:

- BH Boat Harbor Treatment Plant
- CHES City of Chesapeake
- DEMON Deammonification
- HII-NNS Huntington Ingalls Industries Newport News Shipping
- IFM Interceptor Force Main
- MAR Managed Aquifer Recharge
- MHI -Multiple Health Incinerator
- MIFAS Moving Media Integrated
- FIXED- Film Activated Sludge
- PORTS City of Portsmouth
- PRS Pressure Reducing Station
- PS Pump Station
- SCADA Supervisory Control and Data Acquisition
- SF Storage Facility
- SWIFT Sustainable Water Initiative for Tomorrow
- VDOT Virginia Department of Transportation
- VIP Virginia Initiative Plant
