

NOTICE OF EMERGENCY PROCUREMENT

for the

YORK RIVER TREATMENT PLANT HEADWORKS EFFLUENT PIPE REHABILITATION (YR014400)

On November 2, 2020 the Hampton Roads Sanitation District (HRSD) entered into an emergency Construction Contract with Bridgeman Civil, Inc. to perform the York River Treatment Plant Headworks Effluent Pipe Rehabilitation (YR014400) project. The project involves the construction of a distribution chamber extension, approximately 200 linear feet of 48-inch HDPE, new wall pipes for both headworks and distribution chamber number one, grit/debris/rag removal from headworks and distribution chamber number one and 60-inch pipe abandonment.

This project was designated an emergency on September 23, 2020 because it experienced a failure of the 60-inch pipe between the headworks and the primary clarifiers at the York River Treatment Plant on September 17, 2020.
