

Effective July 1, 2009, HRSD began offering commercial and industrial, non-residential customers the following two options to eliminate wastewater treatment charges on all water that is not discharged to the sanitary sewer.

- You may have your water purveyor install a separate water meter for usage that is not discharged into
 the sanitary sewer. If you use only water plumbed to that meter for these purposes, then you will avoid
 treatment charges for water that does not enter the sanitary sewer. You should contact your water
 purveyor for details because in some localities this option also may allow you to avoid local sewer
 charges.
- 2. You may have a plumber install a sub-meter for water usage that is not discharging into the sanitary sewer. Water plumbed to that meter for this type of usage will avoid treatment charges, if you submit your sub-meter reading to HRSD on a regular and timely basis. Please note that ownership and installation of a sub-meter is at your own cost, and you may need to pass your water purveyor's inspection before your installation. After completion of the installation you will need to contact HRSD to register your sub-meter. There is a \$2.00 monthly administration fee for your sub-meter.

If you would like to have a separate meter installed, please contact your water purveyor. For your convenience, we are providing the phone numbers of local water utilities.
