

Exerpts from:

**Pre-Construction Survey Report,
South Trunk Sewer Section G Force
Main Replacement Project, Norfolk,
Virginia,**

January 29, 2016

Mr. Daniel Rickmond
 Tidewater Utility Construction, Inc.
 200 Lummis Road
 Suffolk, Virginia 23434

**Subject: Pre-Construction Survey Report, South Trunk
 Sewer Section G Force Main Replacement
 Project, Norfolk, Virginia (SSI Job No. 15-1168)**

Dear Mr. Rickmond:

Seismic Surveys, Inc. (SSI) is pleased to present this Pre-Construction Survey Report for the designated structures adjacent to your South Trunk Sewer Section G Force Main Replacement project. These surveys were conducted December 14, 2015 through January 15, 2016, in accordance with our contract November 9, 2015. The structures surveyed are summarized in the table below.

SSI ID #	Address	Contact	Phone	Dates Notified	Survey Dates	Survey Extent
1	Virginia Maritime Assn. 236 E. Plume St. Norfolk, VA	Sam Davis	757.622.2639	12-07-15 12-11-15 12-29-15	12-15-15 01-13-16	Interior and Exterior

*Interior survey of closest East wall (Elevation A) of Units 3E & 4A

**Interior survey of closest East wall (Elevation A) of Units 2B & 2E

Observed conditions of the structures were documented in written form along with sketches and digital imagery. The survey documentation and media are arranged by SSI ID No. in the Appendix.

Established conventions were used while conducting these surveys. The first wall to the left, when entering the room, is assigned as wall no. 1. The wall numbering sequence is consecutive in a clockwise direction for building interiors and counterclockwise for building exteriors. Cracks that are less than about 1/16 inch wide are considered hairline unless otherwise noted.

While the pre-construction surveys were conducted in as complete and thorough a manner possible, due to time constraints and other circumstances, some pre-existing conditions will go unnoticed and unnoted. In addition, structures are dynamic in nature and, as such, are subject to a variety of internal and external forces. The forces acting upon a structure do not terminate upon the inception of construction operations in the area. Therefore, these surveys should only be used as a damage reference in conjunction with appropriate geophysical and/or seismic data. Original field documentation and digital imagery are on file in our Frederick, Maryland office.

We appreciate the opportunity to be of service on this project. If you have any questions or require further assistance in this matter, please contact us.

Sincerely,

SEISMIC SURVEYS, INCORPORATED

Matthew W. Anderson, P.E.
Principal Engineer

Right to Access Property
Downtown Norfolk Sanitary Sewer Pipeline Replacement

I hereby acknowledge that I understand the purpose of the pre-existing condition assessment (pre-construction survey) and I am authorized and responsible for the following decision:

- Allow access to the exterior and interior of the property.
- Allow access to the exterior of the property only.
- Allow access to the interior of the property only.
- Deny access to the property.

Video and Photographic Documentation

- Allow the engineer to take photos and videos of the exterior and interior of the property.
- Allow the engineer to take photos and videos of the exterior of the property only.
- Allow the engineer to take photos and videos of the interior of the property only.
- Deny the engineer to take photos and videos of the property.

FOR BLASTING SURVEYS ONLY

Sump Pump: Yes Radon Remediation Installed: No
 Buried Basement: Yes CO Detectors Installed: Yes

ROOF AND DRAINAGE

Roof Materials: Flat - Membrane
 Repairs or Leaks: Repaired leak a few years ago
 Gutters: No Down Spout: No Down Spout Drains To: Sewer
 Drainage away from foundation: Yes Erosion Near Foundation Wall: No
 Well: No Location: NA
 Septic: City septic Location: NA

SETTLEMENT

Settlement Evident: No If Yes, Comment: None

COMMENTS / CONCERNS

Survey extent:

Completed an interior survey of the east and south facing walls of the building (closest sides within 50 ft. of sewer line). This included 3 floors of offices and the 3 lower levels with the control room and HRSD Pump Station underground.

Notes:

Sam Davis has been with Virginia Maritime Association for about 5 years did the best he could with the information on the building. He claims that complete renovations for floors 1-3 were done about 2 years ago. The exterior walls are brick, but have since been covered with thick layer of concrete cover.

Exterior survey was completed on 01-13-16, by Ben Spindler.
