

Technical Information

Waterpilot FMX21

Hydrostatic level measurement

Compact device for level measurement in fresh water, wastewater and saltwater, communication via HART

Reliable and robust level probe with ceramic measuring cell

Application

The Waterpilot FMX21 is a pressure sensor for hydrostatic level measurement. Endress+Hauser offers three different versions of the FMX21 sensor:

- FMX21 with a stainless steel housing, outer diameter of 22 mm (0.87 in): Standard version suitable for drinking water applications and for use in bore holes and wells with small diameters.
- FMX21 with a stainless steel housing, outer diameter of 42 mm (1.65 in): Heavy duty version, easy clean flush-mounted process diaphragm. Ideally suited for wastewater and sewage treatment plants.
- FMX21 with a plastic insulation, outer diameter of 29 mm (1.14 in): Corrosion-resistant version generally for use in saltwater, particularly for ship ballast water tanks.

Your benefits

- High resistance to overload and aggressive media
- High-precision, robust ceramic measuring cell with long-term stability
- Climate proofed sensor thanks to completely potted electronics and 2-filter pressure compensation system
- 4 to 20 mA with superimposed HART 6.0 output signal
- Simultaneous measurement of level and temperature with optionally integrated Pt100 temperature sensor
- Accuracy
 - Reference accuracy $\pm 0.2\%$
 - PLATINUM version $\pm 0.1\%$
- Automatic density compensation to increase accuracy
- Usage in drinking water: KTW, NSF, ACS
- Approvals: ATEX, FM, CSA
- Marine certificate: GL, ABS, LR, BV, DNV
- Extensive range of accessories provides complete measuring point solutions

 ANSI Z39.1	Hazardous area Indicates a hazardous area.
 ANSI Z39.1	Safe area (non-hazardous area) Indicates a non-hazardous location.

Symbols at the device

Symbol	Meaning
	Connecting cable immunity to temperature change Indicates that the connecting cables must be able to withstand temperatures of at least 85 °C (185 °F).

Function and system design

Device selection

Waterpilot FMX21			
Field of application	Hydrostatic level measurement in deep wells e.g. drinking water	Hydrostatic level measurement in wastewater	Hydrostatic level measurement in saltwater
	NOTICE The Waterpilot is not suitable for use in biogas plants since the gases can diffuse through the elastomers (seals, extension cable). ► For applications with biogas Endress+Hauser offers the level transmitter Deltapilot.		
Process connection	■ Mounting clamp ■ Extension cable mounting screw with G 1/4" A or NPT 1/4" thread		
Outer diameter	22 mm (0.87 in)	42 mm (1.65 in)	max. 29 mm (1.14 in)
Extension cable	PE, PUR, FEP (→ 25)		
Seals	■ FKM Viton ■ EPDM ¹⁾	FKM Viton	■ FKM Viton ■ EPDM ¹⁾
Measuring ranges	■ Gauge pressure: from 0 to 0.1 bar to 0 to 20 bar (0 to 1.5 psi to 0 to 300 psi) ■ Absolute pressure: from 0 to 2 bar to 0 to 20 bar (0 to 30 psi to 0 to 300 psi) ■ Customer-specific measuring ranges; factory-calibrated ■ The following output units can be configured: %, mbar, bar, kPa, MPa, mmH ₂ O, mH ₂ O, inH ₂ O, ftH ₂ O, psi and numerous level units.		■ Gauge pressure: from 0 to 0.1 bar to 0 to 4 bar (0 to 1.5 psi to 0 to 60 psi) ■ Absolute pressure: from 0 to 2 bar to 0 to 4 bar (0 to 1.5 psi to 0 to 60 psi)
Overload	Up to 40 bar (600 psi)		Up to 25 bar (375 psi)
Process temperature range	-10 to +70 °C (+14 to +158 °F)		0 to +50 °C (+32 to +122 °F)
Reference accuracy	■ ±0.2 % of the set span ■ Optional: ±0.1 % of set span (PLATINUM version)		
Supply voltage	10.5 to 35 V DC, Ex: 10.5 to 30 V DC		
Output	4 to 20 mA (invertible) with superimposed digital communication protocol HART 6.0, 2-wire		
Options	Drinking water approval	—	
	■ Large selection of approvals, including ATEX, FM, CSA ■ Broad range of accessories ■ Integrated Pt100 temperature sensor and TMT182 temperature head transmitter (4 to 20 mA HART) ■ Marine certificate		
Specialties	■ High-precision, robust ceramic measuring cell with long-term stability ■ Automatic density compensation ■ Customer specific cable marking ■ Absolute pressure measuring cell		

1) Recommended for drinking water applications and not for use in hazardous areas.

Measuring principle

The ceramic measuring cell is a dry measuring cell, i.e. pressure acts directly on the robust ceramic process isolating diaphragm of the Waterpilot FMX21. Any changes in the air pressure are routed through the extension cable, via a pressure compensation tube, to the rear of the ceramic process isolating diaphragm and compensated for. A pressure-dependent change in capacitance caused by the movement of the process isolating diaphragm is measured at the electrodes of the ceramic carrier. The electronics then convert this into a signal which is proportional to the pressure and is linear to the level of the medium.

Temperature measurement with optional Pt100 resistance thermometer ¹⁾

Endress+Hauser also offers the Waterpilot FMX21 with an optional 4-wire Pt100 resistance thermometer to measure level and temperature simultaneously (→ 30). The Pt100 belongs to Accuracy Class B in accordance with DIN EN 60751.

Temperature measurement with optional Pt100 and TMT182 temperature head transmitter ¹⁾

Endress+Hauser also offers the TMT182 temperature head transmitter with the HART protocol to convert the temperature signal to an analog, scalable 4 to 20 mA output signal superimposed with HART 6.0.

See also: 'Density compensation with Pt100 temperature sensor' (→ 9); 'Ordering information' (→ 38); 'Accessories' (→ 30) and Technical Information TI00078R.

1) Not for use in hazardous areas.

Measuring system

As standard, the complete measuring system consists of a Waterpilot FMX21 and a transmitter power supply unit with a supply voltage of 10.5 to 30 V DC (hazardous areas) or 10.5 to 35 V DC (non-hazardous areas).

Possible measuring point solutions with a transmitter and evaluation units from Endress+Hauser:

Application examples

- 1 Waterpilot FMX21 HART
- 2 4 to 20 mA HART
- 3 Overvoltage protection (OP), e.g. HAW from Endress+Hauser (not for use in hazardous areas)
- OP on the sensor side for field installation: HAW569; for top-hat rail/DIN rail: HAW562/Intrinsically safe HAW5622
- OP on the supply side for top-hat rail/DIN rail: HAW561 (115/230 V) and HAW561K (24/48 V AC/DC)
- 4 The overvoltage protection selected must be appropriate for the supply voltage.
Power supply

- A Simple cost-effective measuring point solution: Power supply of Waterpilot in hazardous and non-hazardous areas using RN22 1N active barrier. Power supply and additional control of two consumers, e.g. pumps, via limit switch RTA42 1 with onsite display.
- B Evaluation unit RIA4 5 (for panel mounting) provides a power supply system, an onsite display and two switch outputs.
- C If several pumps are used, the pump service life can be prolonged by alternate switching. With alternating pump control, the pump which was out of service for the longest period of time is switched on. The evaluation unit RIA452 (for panel mounting) provides this option in addition to several other functions.
- D State-of-the-art recording technology with graphic display recorders from Endress+Hauser, such as Ecograph T, Memograph M, or paper recorders such as Alphalog for documenting, monitoring, visualizing and archiving purposes.

Application examples with Pt100

- 1 Waterpilot FMX21 HART
 2 Connection for integrated Pt100 temperature sensor in the FMX21
 3 4 to 20 mA HART (Temperature)
 4 4 to 20 mA HART (Level)
 5 Overvoltage protection (OP), e.g. HAW from Endress+Hauser (not for use in hazardous areas)
 - OP on the sensor side for field installation: HAW569; for top-hat rail/DINrail: HAW562/intrinsically safe HAW562Z
 - OP on the supply side for top-hat rail/DINrail: HAW563 (115/230 V) and HAW561K (24/48 V AC/DC)
 The overvoltage protection selected must be appropriate for the supply voltage.
 6 Power supply

E If you want to measure, display and evaluate the temperature as well as the level, e.g. to monitor temperature in fresh water to detect temperature limits for germ formation, you have the following options:

The optional TMT182 temperature head transmitter can convert the Pt100 signal to a 4 to 20 mA HART signal and transfer it to any common evaluation unit. The RMA421, RIA45 and RIA452 evaluation units also offer a direct input for the Pt100 signal.

F If you want to record and evaluate the level and temperature measured value with one device, use the RMA42, RIA45 and RIA46 evaluation units with two inputs. It is even possible to mathematically link the input signals with this unit. These evaluation units are not HART-compatible.

Level measurement with absolute pressure probe and external pressure signal

- 1 Fieldgate FK4520
- 2 Multidrop-Connector FXN520
- 3 Cerabar
- 4 Waterpilot FMX21

It is advisable to use an absolute pressure probe for applications in which condensation can occur. In the case of level measurement with an absolute pressure probe, the measured value is affected by fluctuations in the ambient pressure. To correct the resulting measured error, you can connect an external absolute pressure sensor (e.g. Cerabar) to the HART signal cable, switch the waterpilot to the burst mode and the Cerabar to operate in mode "Electr. Delta P". The external absolute pressure sensor then calculates the difference between the two pressure signals and can thus determine the level precisely. Only one level measured value can be corrected in this way.

If using intrinsically safe devices, strict compliance with the rules for interconnecting intrinsically safe circuits as stipulated in IEC60079-14 (proof of intrinsic safety) is mandatory.

Density compensation with Pt100 temperature sensor

The Waterpilot FMX21 can correct measured errors that result from fluctuations in the density of the water caused by temperature. Users can choose from the following options:

Use the internally measured sensor temperature of the FMX21

The internally measured sensor temperature is calculated in the Waterpilot FMX21 for density compensation. The level signal is thus corrected according to the density characteristic line of the water.

Use the optional internal temperature sensor for density compensation in a suitable HART master (e.g. PLC)

The Waterpilot FMX21 is available with an optional Pt100 temperature sensor. Endress+Hauser additionally offers the TMT182 temperature head transmitter to convert the Pt100 signal to a 4 to 20 mA HART signal.

The temperature and pressure signals are transmitted to the HART master (e.g. PLC) where a corrected level value can be generated using a stored linearization table or the density function (of a chosen medium).

- 1 HART Master, e.g. PLC (programmable logic controller)
- 2 FXN520 Multidrop-Connector
- 3 TMT182 Temperature head transmitter
- 4 Waterpilot FMX21

Use an external temperature signal which is transmitted to the FMX21 via HART burst mode

The Waterpilot FMX21 is available with an optional Pt100 temperature sensor. In this case, the signal of the Pt100 is analyzed using a HART-compliant (at least HART 5.0) temperature transmitter that supports BURST mode. The temperature signal can thus be transmitted to the FMX21. The FMX21 uses this signal for the density correction of the level signal.

The TMT182 temperature head transmitter is not suitable for this configuration.

- 1 Fieldgate FXA520
- 2 Multidrop-Connector FXN520
- 3 TMT182 Temperature head transmitter
- 4 Waterpilot FMX21

Without additional compensation due to the anomaly of water, errors of up to 4 % may occur at a temperature of +70 °C (+158 °F), for example. With density compensation, this error can be decreased to 0.5% in the entire temperature range from 0 to +70 °C (+32 to +158 °F).

For further information please refer to the appropriate Technical documentation:

- TI00078R: TMT182 temperature head transmitter (4 to 20 mA/HART)
- TI00369F: FXA520 Fieldgate
- TI00400F: FXN520 multidrop connector

Communication protocol

4 to 20 mA HART with communication protocol

System integration

The device can be fitted with a tag name, 'Ordering information', feature 895 'Marking' version 'Z1' (→ 38).

Input

Measured variable	FMX21 + Pt100 (optional)	TMT182 temperature head transmitter (optional)

1) Recommended Turn down: Max 100:1
Factory calibration Turn down: Max 20:1, higher on request.

2) Ordering information (→ p. 28)

3) These measuring ranges are not offered for the probe version with plastic insulation, outer diameter 29 mm (1.14 in).

Input signal	FMX21 + Pt100 (optional)	TMT182 temperature head transmitter (optional)
	- Change in capacitance - Pt100: change in resistance	Pt100 resistance signal, 4-wire

Output

Output signal	FMX21 + Pt100 (optional) 4 to 20 mA with overlying digital HART 6.0 communication protocol, 2-wire for hydrostatic pressure measured value - Pt100: Temperature-dependent resistance values	TMT182 temperature head transmitter (optional) 4 to 20 mA with overlying digital HART 5.0 communication protocol for temperature measured value, 2-wire
Signal range	3.8 to 20.5 mA	
Signal on alarm	FMX21 + Pt100 (optional) 4 to 20 mA HART Options: - Max. alarm (factory setting 22 mA): can be set from 21 to 23 mA - Hold measured value: last measured value is held - Min. alarm: 3.6 mA	TMT182 temperature head transmitter (optional) Options: - Max. alarm ≥ 21.0 mA - Min. alarm ≤ 3.6 mA
Load	FMX21 $R_{Lmax} \leq \frac{U - 10.5 \text{ V}}{23 \text{ mA}} - 2 \cdot 0.09 \frac{\Omega}{\text{m}} \cdot l - R_{add}$ ANEXOS 10.02	TMT182 temperature head transmitter (optional) $R_{Lmax} \leq \frac{U - 11.5 \text{ V}}{0.023 \text{ A}} - R_{add}$ ANEXOS 10.03

R_{Lmax} = Max. load resistance [Ω]

R_{add} = Additional resistances such as resistance of evaluation unit and/or display unit, cable resistance [Ω]

U = Supply voltage [V]

l = Simple length of extension cable [m], (cable resistance per wire $\leq 0.09 \Omega/\text{m}$)

When using the measuring device in hazardous areas, installation must comply with the corresponding national standards and regulations and the Safety Instructions or Installation or Control Drawings (XA).

FMX21 load chart for estimating the load resistance. Additional resistances, such as the resistance of the extension cable, have to be subtracted from the value calculated as shown in the equation.

Temperature head transmitter TMT182 load chart for estimating the load resistance. Additional resistances have to be subtracted from the value calculated as shown in the equation.

When operating using a HART handheld terminal or a PC with an operating program, a minimum communication resistance of 250 Ω has to be taken into account.

Damping	- Continuously 0 to 999 s via HART handheld terminal or PC with operating program - Factory setting: 2 s
---------	---

Power supply

When using the measuring device in hazardous areas, installation must comply with the applicable national standards and regulations and the Safety Instructions (XAs) and the Installation or Control Drawings (ZDs). All explosion-protection data are given in a separate documentation which is available upon request. This documentation is provided with the devices as standard (→ " 32).

Supply voltage	FMX21 + Pt100 (optional) 10.5 to 35 V (non-hazardous area) 10.5 to 30 V (hazardous area)	TMT182 temperature head transmitter (optional) 11.5 to 35 V DC
Power consumption	FMX21 + Pt100 (optional) ≤ 0.805 W at 35 V DC (non-hazardous area) ≤ 0.690 W at 30 V DC (hazardous area)	TMT182 temperature head transmitter (optional) ≤ 0.805 W at 35 V DC
Current consumption	FMX21 + Pt100 (optional) - Max. current consumption: ≤ 23 mA - Min. current consumption: ≥ 3.6 mA - Pt100: ≤ 0.6 mA	TMT182 temperature head transmitter (optional) - Max. current consumption: ≤ 23 mA - Min. current consumption: ≥ 3.5 mA - Pt100 via temperature head transmitter: ≤ 0.6 mA
Measuring unit electrical connection	- Reverse polarity protection is integrated in the Waterpilot FMX21 and in the TMT182 temperature head transmitter. Changing the polarities will not damage the devices. - The cable must end in a dry room or a suitable terminal box. The terminal box (IP66/IP67) with a GORE-TEX® filter from Endress+Hauser is suitable for outdoor installations. The terminal box can be ordered as an accessory using the order code for FMX21 version 'PS' for feature 620 (→ " 28).	

The electrical connection is made with the corresponding wires of the probe cable and with the optional use of the terminal box (Commubox FXA) or an active barrier (e.g. RN221N).

- 6 Guide pipe
- 7 Waterpilot FMX21
- 8 Additional weight can be ordered as an accessory for FMX21 with an outer diameter of 22 mm (0.87 in.) and 29 mm (1.14 in.)
- 9 Protection cap

Additional installation instruction

- Sideways movement of the level probe can result in measuring errors. For this reason, install the probe at a point free from flow and turbulence, or use a guide tube. The internal diameter of the guide tube should be at least 1 mm (0.04 in.) bigger than the outer diameter of the selected FMX21.
- The device is provided with a protection cap to prevent mechanical damage to the measuring cell.
- The cable must end in a dry room or a suitable terminal box. The terminal box from Endress+Hauser provides optimum humidity and climatic protection and is suitable for outdoor installation (→ 30).
- Rod length tolerances: < 5 m (16 ft): ±17.5 mm (0.69 in.); > 5 m (16 ft): ±0.2 % (→ 31)
- If the cable is shortened, the filter at the pressure compensation tube has to be reattached. Endress+Hauser offers a cable shortening kit for this purpose → 28 ff; (SD00552P/00/A6).
- Endress+Hauser recommends using twisted, shielded cables.
- Note for ship building applications: Measures for limitation of the propagation of fire along cable bundles are required (fire stops).

Environment

Ambient temperature range	FMX21 + Pt100 (optional) - With outer diameter of 22 mm (0.87 in) and 42 mm (1.65 in): -10 to +70 °C (+14 to +158 °F) (= medium temperature) - With outer diameter of 29 mm (1.14 in): 0 to +50 °C (+32 to +122 °F) (= medium temperature) Cable (fixed installation) - PE: -30 to +70 °C (-22 to +158 °F) - FEP: -40 to +70 °C (-40 to +158 °F) - PUR: -40 to +70 °C (-40 to +158 °F) Terminal box -40 to +80 °C (-40 to +176 °F)	TMT182 temperature head transmitter (optional) -40 to +85 °C (-40 to +185 °F)
Storage temperature range	FMX21 + Pt100 (optional) -40 to +80 °C (-40 to +176 °F) Cable (fixed installation) - PE: -30 to +70 °C (-22 to +158 °F) - FEP: -30 to +80 °C (-22 to +176 °F) - PUR: -40 to +80 °C (-40 to +176 °F) Terminal box -40 to +80 °C (-40 to +176 °F)	TMT182 temperature head transmitter (optional) -40 to +100 °C (-40 to +212 °F)
Degree of protection	FMX21 + Pt100 (optional) IP68, permanently hermetically sealed at 20 bar (290 psi) (~200 m H ₂ O) Terminal box (optional) IP66, IP67	TMT182 temperature head transmitter (optional) IP00, condensation permitted
Geometric height according to IEC61010-1 Ed.3	Up to 2 000 m (6 600 ft) above MSL	
Electromagnetic compatibility (EMC)	FMX21 + Pt100 (optional) - EMC in accordance with all the relevant requirements of the EN 61326 series. Details are provided in the Declaration of Conformity. - Maximum deviation < 0.5 % of the span.	TMT182 temperature head transmitter (optional) EMC in accordance with all the relevant requirements of the EN 61326 series. Details are provided in the Declaration of Conformity.

Overvoltage protection	FMX21 + Pt100 (optional) - Integrated overvoltage protection to EN 61000-4-5 (500 V symmetrical/1000 V asymmetrical) - Install overvoltage protection ≥ 1.0 kV, external if necessary	TMT182 temperature head transmitter (optional) Install overvoltage protection, external if necessary.
------------------------	---	---

Process

Medium temperature range	FMX21 + Pt100 (optional) - With outer diameter of 22 mm (0.87 in) and 42 mm (1.65 in): -10 to +70 °C (+14 to +158 °F) - With outer diameter of 29 mm (1.14 in): 0 to +50 °C (+32 to +122 °F)	TMT182 temperature head transmitter (optional) —
--------------------------	--	--

Medium temperature limits	FMX21 + Pt100 (optional) - With outer diameter of 22 mm (0.87 in) and 42 mm (1.65 in): -20 to +70 °C (-4 to +158 °F)  In hazardous areas incl. CSA GP, the medium temperature limit is at -10 to +70 °C (+14 to +158 °F). - With outer diameter of 29 mm (1.14 in): 0 to +50 °C (+32 to +122 °F)  The FMX21 can be operated in this temperature range. The specification can then be exceeded, e.g. measuring accuracy.	—
---------------------------	---	---

Mechanical construction

Dimensions of the level probe

Versions of the FMX11

- A In the order code: feature 45 "Probe tube", version "1" or "Accessories" (→ "28")
 B In the order code: feature 45 "Probe tube", version "2" (→ "28")
 C In the order code: feature 45 "Probe tube", version "5" (→ "28")

- 1 Dredging compensation tube
 2 Extension cable (Length, see → "28")
 3 Protection cap

Dimensions of the mounting clamp

In the order code: feature 620 "Accessories", version "90" (→ "28")

Dimensions of the extension cable mounting screws

- A G 1/4" A, in the order code: feature 620 'Accessories', version 'P2' (→ '128')
 B NPT 1/4", in the order code: feature 620 'Accessories', version 'P2' for (→ '128')

i Application in unpressurized containers only.

Dimensions of the IP66, IP67 terminal boxes with filters

In the order code: feature 620, version 'P2' or 'P1' (→ '128')

- 1 Dummy plug M20x1.5
 2 Cable gland M20x1.5
 3 4 to 20 mA; terminals for 0.08 to 2.5 mm² (28 to 14 AWG)
 4 Ground connection; terminals for 0.08 to 2.5 mm² (28 to 14 AWG)
 5 GORE-TEX® filter

If ordered together with FMX21 but without the optional TMT182 temperature transmitter, the terminal box is incl. a 4-terminal strip.

i The 4-terminal strip is not intended for use in hazardous areas incl. CSA GP.

Dimensions of the TMT182 temperature head transmitter

In the order code: feature 020 'Accessories', version: DT for (→ 118)

Terminal box with integrated TMT182 temperature head transmitter (4 to 20 mA HART)

 A distance of > 7 mm (> 0.28 in mm) must be maintained between the terminal strip and the TMT182 temperature head transmitter.

Weight

Component part		Weight
Level probe, outer diameter 22 mm (0.87 in)		344 g (12.133 oz)
Level probe, outer diameter 42 mm (1.65 in)		1376 g (48.532 oz)
Level probe, outer diameter 29 mm (1.14 in)		394 g (13.896 oz)
Extension cable	• PE	• 52 g/m (0.035 lbs/1 ft)
	• PUR	• 60 g/m (0.040 lbs/1 ft)
	• FEP	• 108 g/m (0.072 lbs/1 ft)
Mounting clamp		170 g (5.996 oz)
Extension cable mounting screw G 1/4" A		770 g (27.158 oz)
Extension cable mounting screw NPT 1/4"		724 g (25.535 oz)
Terminal box		235 g (8.288 oz)
Temperature head transmitter TMT182		40 g (1.411 oz)
Additional weight		300 g (10.581 oz)
Testing adapter		39 g (1.376 oz)

Material

Material in contact with process		
Position number	Component part	Material
1	A: Level probe, outer diameter 22 mm (0.87 in) B: Level probe, outer diameter 42 mm (1.65 in) C: Level probe, outer diameter max. 29 mm (1.14 in)	316L (1.4404/1.4435)
1.1	Sensor sleeve	PFS (polyphenylene sulfide)
1.2	Heat-shrink sleeve	Polyolefin and hot-melt adhesive
	 The heat-shrink sleeve at the level probe acts as an insulation. It prevents electrical contact between the probe and the tank. Electrochemical corrosion is thus avoided.	
2	Protection cap - A and C: with outer diameter 22 mm (0.87 in) and 29 mm (1.14 in) - B: with outer diameter 42 mm (1.65 in)	- PFO (Polyphenylenoxid) - FFA (Perfluoralkoxy)
3	Process ceramic	Al ₂ O ₃ (aluminum oxide ceramic)
4	Seal	EPDM or FKM Viton
5	Extension cable insulation For more information → p. 25	Either: - PE-LD (low-density polyethylene) - FEP (fluorinated ethylene propylene) - PUR (polyurethane)
Material not in contact with process		
6	Pressure compensation tube	PA
7	Heat-shrink sleeve	Polyolefin

Terminal box (not in contact with process)

401389.02

Position number	Component part	Material
1	Housing	PC
2	Mounting screws (4 x)	A2
3	Seal	CR (Chloropren-Unvulcanized rubber)
4	Dummy plug M20x1.5	PBT-GF30
5		PE-HD
6	Cable gland M20x1.5	PA6
7		PA6-GF30
8	Pressure compensation tube	PA6-GF10, ePTFE
9	Pressure compensation tube O-ring	Silicone (VMQ)

Cable mounting screw (not in contact with process)

401389.02

Position number	Component part	Material
1	Cover cable gland	304 (1.4301)
2	Seal	NBR
3	Klemmhülse	PA66-GF35
4	Anschlussstück cable gland G 1 1/4" A, NPT 1 1/2"	304 (1.4301)
5	Seal → only for G 1 1/4" A	EPDM

Extension cable

PE	PUR	FEP
▪ Abrasion-resistant extension cable with Dynema strain-relief members ▪ Shielded with aluminum-coated film ▪ Insulated with polyethylene (PE), black ▪ Copper wires, twisted ▪ Pressure compensation tube with Teflon filter	▪ Abrasion-resistant extension cable with Dynema strain-relief members ▪ Shielded with aluminum-coated film ▪ Insulated with polyurethane (PUR), black ▪ Copper wires, twisted ▪ Pressure compensation tube with Teflon filter	▪ Abrasion-resistant extension cable ▪ Shielded with galvanized steel wire netting ▪ Insulated with fluorinated ethylene propylene (FEP), black ▪ Copper wires, twisted ▪ Pressure compensation tube with Teflon filter

Cable length

A Cable length

- Please refer also to 'Load' (→ 12).
- Cable lengths that can be ordered
 - Customer-specific length in meters or feet (→ 26, 'Ordering information')
 - Limited cable length when performing installation with freely suspended device with extension cable mounting screw or mounting clamp, as well as for hazardous areas: max. 300 m (984 ft).

i When using the measuring device in hazardous areas, installation must comply with the applicable national standards and regulations and the Safety Instructions (XAs) or the Installation or Control Drawings (ZDs) 'Documentation'

Cross-section

- Total outer diameter: 8.0 mm (0.31 in) ± 0.25 mm (± 0.01 in)
- FMX21: $3 \times 0.227 \text{ mm}^2$ (3 x 26 AWG) + pressure compensation tube with Teflon filter
- FMX21 with Pt100 (optional): $7 \times 0.227 \text{ mm}^2$ (7x 26 AWG) + pressure compensation tube with Teflon filter
- Pressure compensation tube with Teflon filter:
 - outer diameter 2.5 mm (0.1 in), internal diameter 1.5 mm (0.06 in)

Cable resistance

per wire: $\leq 0.09 \Omega/\text{m}$

Further technical data

- Minimum bending radius: 120 mm (4.72 in)
- Tensile strength: max. 950 N (213.56 lbf)
- Cable extraction force (= necessary tensile force to extract the cable from the level probe):
 - PE, FEP: typical $\geq 400 \text{ N}$ (89.92 lbf), PUR: typical $\geq 150 \text{ N}$ (33.72 lbf)
 - for use in hazardous areas: $\geq 100 \text{ N}$ (73.75 lbf)
- Resistance to UV light
- PE: Usage in drinking water

Terminals

- Three terminals as standard in the terminal box
- 4-terminal strip can be ordered as an accessory, Order No: 52008938
Conductor cross-section 0.08 to 2.5 mm^2 (28 to 14 AWG)

i The 4-terminal strip is not intended for use in hazardous areas incl. CSA GP.

Operability

FieldCare	FieldCare is Endress+Hauser's plant asset management tool based on FDT technology. You can use FieldCare to configure all Endress+Hauser devices as well as third-party devices which support the FDT standard. FieldCare supports the following functions: ■ Configuration of transmitters in offline and online mode ■ Loading and saving device data (upload/download) ■ Documentation of the measuring point Connection options: ■ Via Commubox FXA195 and the USB port of a computer ■ Via Fieldgate FXA520 For further information and free download of FieldCare see → www.endress.com → Download → Search: FieldCare
Field Xpert SFX	Field Xpert is an industrial PDA with integrated 3.5" touchscreen from Endress+Hauser based on Windows Mobile. It communicates via wireless with the optional VIATOR® Bluetooth® modem, connected to a HART device point-to-point or wireless via WiFi and Endress+Hauser's Fieldgate FXA520. Field Xpert also works as a stand-alone device for asset management applications. For details refer to BA000605/00/EN.

Certificates and approvals

CE mark	The device meets the legal requirements of the applicable EC Directives. Endress+Hauser confirms successful testing of the device by affixing to it the CE mark.
Ex approval	■ ATEX ■ CSA C/US ■ FM ■ IEC ■ NEPSI ■ INMETRO  The approvals to apply only for Waterpilot FMX21 without Pt100 and without IMT182. ■ Waterpilot FMX21 is only available for use in hazardous areas with the FKM Viton seal. ■ All explosion protection data are given in separate documentation which is available upon request. The Ex documentation is supplied as standard with all devices approved for use in explosion hazardous areas (→ p. 32).
Drinking water approval	For FMX21 with outer diameter 22 mm (0.87 in) ■ KTW certificate ■ NSF 61 approval ■ ACS approval
Marine certificate	■ GL (Germanischer Lloyd) ■ ABS (American Bureau of Shipping) ■ LR (Lloyds Register) ■ BV (Bureau Veritas) ■ DNV (Det Norske Veritas)
Standards and guidelines	The European standards and guidelines that have been applied are listed in the associated EC Declarations of Conformity. In addition, the following standards were also applied for the Waterpilot FMX21: ■ DIN EN 60770 (IEC 60770): Transmitters for use in industrial process control systems Part 1: Methods for performance evaluation ■ DIN 16086: Electrical pressure measuring instruments, pressure sensors, pressure transmitters, pressure measuring instruments, concepts, specifications on data sheets ■ EN 61326: Electrical equipment for measurement, control and laboratory use – EMC requirements ■ EN 61010-1 (IEC 61010-1): Safety requirements for electrical equipment for measurement, control and laboratory use ■ IEC 60529: Degrees of protection provided by enclosures

Ordering information

FMX21

Accessories

Mounting clamp

- Endress+Hauser offers a mounting clamp for easy FMX21 mounting (→ 20).
- Material: 316L (1.4404) and fiberglass reinforced PA (polyamide)
- Order number 52006151, 'Ordering information' (→ 28)

Terminal box

- IP66/IP67 terminal boxes with GORE-TEX® filter incl. 3 integrated terminals. The terminal box is also suitable for installing a TMT182 temperature head transmitter or for four additional terminals (Order No. 52008938) → 21, 'Ordering information' (→ 28).

i The terminal box is not intended for the FMX21 with Ex nA explosion protection in the hazardous area. When using the terminal box in hazardous areas, installation must comply with the corresponding national standards and regulations and the Safety Instructions or Installation or Control Drawings.

Additional weight

For FMX21 with outer diameter of 22 mm (0.87 in) or 29 mm (1.14 in)

- Endress+Hauser offers additional weights to prevent sideways movement that results in measuring errors, or to make it easier to lower the device in a guide tube. You can screw several weights together. The weights are attached directly to the FMX21. For FMX21 with an outer diameter of 29 mm (1.14 in) a maximum of 5 weights may be attached. In combination with the Ex nA approval, for FMX21 with an outer diameter of 29 mm (1.14 in) a maximum of 1 additional weight may be attached.
- Material: 316L (1.4435)
- Weight: 300 g (10.581 oz)
- Order number 52006153, 'Ordering information' (→ 28)

TMT182 temperature head transmitter (4 to 20 mA HART)

- 2-wire temperature head transmitter, configured for a measuring range from -20 to +80 °C (-4 to +158 °F). This setting offers a temperature range of 100 K which can be easily mapped. Please note that the Pt100 resistance thermometer is designed for a temperature range from -10 to +70 °C (-14 to +176 °F) → 22.
- Order number: 51001023, 'Ordering information' (→ 28)

i The TMT182 temperature head transmitter is not intended for use in hazardous areas incl. CSA GP.

Extension cable mounting screw

- Endress+Hauser offers extension cable mounting screws to ease FMX21 mounting and to seal the measuring aperture (→ 21).
- Order number for extension cable mounting screw:
 - 52008264 (G 1½" A)
 - 52009311 (NPT 1½")
 - Material (→ 23)

Terminals

- Four terminals in strip for terminal box, suitable for wire cross-section: 0.08 to 2.5 mm² (28 to 14 AWG)
- Order number: 52008938

i The 4-terminal strip is not intended for use in hazardous areas incl. CSA GP.

Cable shortening kit

- The cable shortening kit is used to easily and professionally shorten a cable.
- Order Number: 71222671, "Ordering information" and the documentation SD00552F/00/A6 (→ 28)

i The cable shortening kit is not intended for the FMX21 with FM/CSA approval.

Cable marking

A Cable marking
B Cable marking tolerance

- To make installation easier, Endress+Hauser offers a mark on the extension cable for a customer-specific length, see also → 28, "Ordering information".
- Cable marking tolerance (distance to the lower end of the cable probe):
Cable length < 5 m (16 ft): ± 17.5 mm (0.69 in)
Cable length > 5 m (16 ft): ± 0.2 %
- Material: PET, Adhesive: acrylic
- Immunity to temperature change:
-30 to +100 °C (-22 to +212 °F)

NOTICE

The mark is for installation purposes only.

- It must be thoroughly removed without trace in the case of devices with drinking water approval. The extension cable must not be damaged in the process

Not for use in hazardous areas.

Testing adapter

1 FMX21 level probe connection
2 Compressed air hose connection, internal diameter of quick coupling piece 4 mm (0.16 in)

For FMX21 with outer diameter of 22 mm (0.87 in) and 29 mm (1.14 in)

- Endress+Hauser offers a testing adapter to ease function-testing of the level probes.
- Observe the maximum pressure for the compressed air hose and the maximum overload for the level probe (→ 11).
- Maximum pressure of the quick coupling piece supplied: 10 bar (145 psi)
- Adapter material: 304 (1.4301)
- Quick coupling piece material: anodized aluminum
- Adapter weight: 39 g (1.376 oz)
- Order number 52011868 (→ 28)

Ambient humidity	Umgebungs-Luftfeuchte	27.9 %rel.F (± 10 %rel.F)
Ambient pressure	Umgebungs-Luftdruck	980.8 mbar (± 0.2 mbar)
Calibrated according to fix point method IEC 60770. Prüfung nach Grenzpunktmethode gemäß IEC 60770.		

Measuring results / Messergebnisse

Calibration point	Nominal value (p _{ref})	Measured value (digital readout)	Deviation (digital)	Nominal value (I _{0,ref} calculated)	Current output (analog)	Rel. deviation (analog)	Calibration orientation
Kalibrierpunkt	Sollwert (p _{Ref})	Istwert (Digitaler Wert)	Abweichung (digital)	Sollwert (I _{0,ref} berechnet)	Istwert Stromausgang (analog)	Rel. Abweichung (analog)	Kalibrierlage
%	inH ₂ O	inH ₂ O	% of Span	µA	mA	%	
0	0.00000	0.00040	0.00010	4.00000	3.99994	-0.00036	
51	202.402	202.394	-0.00197	12.09608	12.09430	-0.01115	
99	397.588	397.588	-0.00055	19.90352	19.90399	0.00295	

Calibration carried out in output mode linear.
Kalibration erfolgte im Ausgangsmodus linear.

We confirm that all tests, according to the Quality Plan (QP), have been performed successfully. At the time of verification, the measuring points of the device indicated above were in compliance to the published valid technical specification (TI).

TI 431P

Measuring point in % of adjusted measuring range/
Messpunkt in % vom eingestellten Messbereich

Wir bestätigen, dass alle Tests aus dem Qualitätsplan (QP) erfolgreich durchgeführt wurden. Das Gerät entspricht zum Zeitpunkt der Prüfung an den aufgeführten Messpunkten den gültigen technischen Spezifikationen (TI).

Hazardous location

Class I, Div. 1, Groups A, B, C, D
Class I, Zone 0
AEx ia IIC

Non hazardous location

Sensor

Temperature class	Ambient temperature range
T4	$-10^{\circ}\text{C} \leq T_a \leq +70^{\circ}\text{C}$
T5	$-10^{\circ}\text{C} \leq T_a \leq +55^{\circ}\text{C}$
T6	$-10^{\circ}\text{C} \leq T_a \leq +40^{\circ}\text{C}$

Terminal box

Temperature class	Ambient temperature range
T6	$-40^{\circ}\text{C} \leq T_a \leq +80^{\circ}\text{C}$

Terminal box (Accessory):

Intrinsically safe (entity), Class I, Div. 1, Groups A, B, C, D or Zone 0, IIC Hazardous Location Installations

1. FM approved apparatus must be installed in accordance with manufacturer instructions.
2. Control room equipment must not use or generate over 250 V.
3. The installation must be in accordance with the National Electric Code ANSI / NFPA 70 and ANSI / ISA-RP 12.08.01.
4. Sensor entity parameters: $V_{max} = 30\text{ V DC}$, $I_{max} = 133\text{ mA}$, $P_{max} = 1\text{ W}$. CI and LI per following table:

Length of sensor cable	CI (10.3 nF + 180 pF/m)	LI (1 $\mu\text{H}/\text{m}$)
5 m	11.3 nF	5 μH
10 m	12.2 nF	10 μH
20 m	14.0 nF	20 μH
30 m	15.8 nF	30 μH
50 m	19.4 nF	50 μH
100 m	28.4 nF	100 μH
200 m	48.4 nF	200 μH
300 m	64.4 nF	300 μH

5. FM approved associated equipment must meet following conditions:
 V_{oc} or $V_t \leq V_{max}$; I_{sc} or $I_o \leq I_{max}$; $P_o \leq P_{max}$;
 $C_a \geq C_i + C_{cable}$; $L_a \geq L_i + L_{cable}$.
Install associated equipment in accordance with the manufacturer instructions.
6. Use supply wires suitable for 5°C above surrounding ambient.
7. Avoid friction and impact sparks. Anchor sensor if necessary, secure against swinging.
8. WARNING: Avoid electrostatic charging of plastic surfaces. Do not rub. Do not use in media or environments which may generate electrostatic charges on plastic surfaces.
9. WARNING: Substitution of components may impair intrinsic safety.
10. Do not remove or move terminal blocks, fastening elements or insulation plates of the terminal box. Do not build in additional components.
11. Connect cable screen to earth ground of the installation.
