

## HRSD Infrastructure:

*Your investment in public health, area waterways and the region's economy.*

HRSD is undertaking a \$156 million project that will upgrade its Virginia Initiative Plant (VIP) in Norfolk by:

- Enhancing its ability to remove nutrients (nitrogen and phosphorus) from wastewater
- Increasing the hydraulic capacity so the plant can treat additional flows during storms
- Replacing aging equipment to improve operations.

The VIP project is doing more than protecting public health, improving water quality and enhancing reliable wastewater treatment - it is also providing jobs in our region for contractors and their suppliers. To take a virtual tour of this project, and to learn more about the many HRSD initiatives underway throughout the region to help ensure that future generations inherit clean waterways, visit [www.hrzd.com/constructionstatus](http://www.hrzd.com/constructionstatus).

HDR and MEB are proud to partner with HRSD on the VIP project, and pleased to call attention to the importance of renewing our infrastructure. To learn more about HDR, please visit [www.hdrinc.com](http://www.hdrinc.com). To learn more about MEB, please visit [www.mebgc.com](http://www.mebgc.com).
