

CONSTRUCTION NOTIFICATION – June 2017

Bridge Street Pump Station

--Pipeline Installation along Bridge Street Continues--

HRSD, your regional wastewater treatment utility, continues work to construct a new sanitary sewer pump station at 515 Bridge Street. The new structure, which was designed to blend into the neighborhood, will replace the facility built in 1945 at 4701 Victoria Boulevard. This work is to take place primarily between the hours of 7 a.m. to 5 p.m., Monday through Friday. This work should not affect your water or sewer services and is weather and situation dependent.

This HRSD project is unrelated to the City of Hampton managed Bridge Street bridge replacement project over Salters Creek.

The first crew will continue work on the pump station within the fenced project area to form the below ground basement area for the new station. The below ground work is expected to continue through summer 2017.

A second crew will continue work installing two new pipelines along Bridge Street. Detour plans will continue to be utilized to assist motorists around the construction activity. The Bridge Street work area will be condensed between Linden Avenue and Marrow Street, sidewalks and parking will be available, and all work in the street will cease prior to and during Southern Bay Race Week (June 1-4). Work along Bridge Street will resume on June 5 and is estimated to continue through the end of July. The roadway will be temporarily patched once the pipe installation is complete. Final paving will take place after the final sections of sewers are connected and tested at the completion of the project in winter 2018.

While our contractor and project team will work diligently to minimize impacts, you may notice some odor, the construction crews onsite, heavy equipment (with back-up safety alarms), and the noise associated with construction.

Please visit the HRSD website, www.hrsd.com, for updated project information. Look for the Construction Status link. Click on Hampton and then on Bridge Street Pump Station.
