

# CONSTRUCTION NOTIFICATION July 2017

## Elm Avenue Sanitary Sewer Pipeline Replacement --Construction Work to Begin--

HRSD, your regional wastewater treatment utility, is replacing a sanitary sewer pipeline previously installed in the 1940s. The new sewer pipeline will be located along Elm Avenue from South Street to County Street. In cooperation with the City of Portsmouth, HRSD will redirect two facilities (Neighborhood Facility Recreation Center and Portsmouth Community Library Museum) from the existing water line to an adjacent newer water line. Once these connections have been completed the older water line to be taken out of service. This work is to take place primarily between the hours of **7 a.m. to 5 p.m., Monday through Friday.**

**The contractor will begin preparing the site for work and will close two lanes along Elm Avenue, from South Street to County Street, leaving one travel lane available in each direction.**

The work will begin with the City water line connections and the old water line being taken out of service.

Work will then begin on the sewer pipeline. Once the new sewer pipeline has been installed and tested, the old pipeline will be filled with a cement-like material and left in place to minimize additional disruption.

This work can be weather and situation dependent and should not affect your water or sewer services.

While our project team works diligently to minimize impacts, you may notice increased noise, traffic and the crews and heavy equipment associated with construction. Please take care when traveling around the construction area and for your safety, do not enter the site.

Thank you for your support of this effort to help achieve HRSD's vision:

*Future generations will inherit clean waterways and be able to keep them clean.*
