

CONSTRUCTION NOTIFICATION August 4, 2017

Elm Avenue Sanitary Sewer Pipeline Replacement

--Brief Water Service Disruption expected on August 7--

HRSD, your regional wastewater treatment utility, is replacing a sanitary sewer pipeline previously installed in the 1940s. The new sewer pipeline will be located along Elm Avenue from South Street to County Street. In cooperation with the City of Portsmouth, HRSD will redirect two facilities (Neighborhood Facility Recreation Center and Portsmouth Community Library Museum) from the older water line to the newer water line so the older water line can be taken out of service. **As requested by the City of Portsmouth, this work will take place between the hours of 5 p.m. to 7 p.m., Monday** and is weather and situation dependent.

Due to the recreation center's summer camp, this work needs to be completed in the evening after the children have been picked up.

On August 7, your water service will be disrupted for a few hours while the contractor installs the two service connections on the water line on the east side of Elm Avenue.

Once the water line work has been completed, work will then begin on the sewer pipeline. Once the new sewer pipeline has been installed and tested, the old pipeline will be filled with a cement-like material and left in place to minimize additional disruption.

While our project team works quickly to minimize impacts, you may notice increased noise, traffic and the crews and heavy equipment associated with construction. Please take care when traveling around the construction area and for your safety, do not enter the site.

Thank you for your support of this effort to help achieve HRSD's vision:

Future generations will inherit clean waterways and be able to keep them clean.
