

CONSTRUCTION NOTICE

Holland Road Sanitary Sewer Pipeline Replacement-Phase I --Public Water Main Work Begins --

HRSD, your regional wastewater treatment utility, is undertaking a project to construct a new sanitary sewer pipeline to replace the existing pipeline built in the 1970s. HRSD is also working with the City of Suffolk to replace approximately 3,300 linear feet of water main piping in the Oak Ridge Subdivision as a part of this project. This work is to primarily take place between the hours of 7 a.m. – 4 p.m., Monday through Friday. This work is weather and situation dependent.

In the coming weeks, the contractor will begin the installation of the new public water main. This work will begin in Delaney Drive, working south down Grove Avenue, towards Holland Road. The existing water main will remain in service until the new water main work is complete, ensuring no disruption to your water service. This work is expected to last through the summer. Temporary paving will be placed as this work progresses.

After the new public water main pipe has been installed, the contractor will then make the private water connections and install the HRSD pipeline. Final paving will take place after the entire project is completed and will restore the roadway from curb to curb.

While our contractor and project team work diligently to minimize impacts, you may notice some noise, dust and increased heavy equipment traffic associated with construction. Please take care when traveling around the construction area and for your safety, do not enter the site. Thank you for your support of this effort to help achieve HRSD's vision: *Future generations will inherit clean waterways and be able to keep them clean.*

Please visit the HRSD website, www.hrsd.com, for updated project information. Look for the Construction Status link, Click on Suffolk and then the Holland Road Sanitary Sewer Pipeline Replacement-Phase I link.
