

CONSTRUCTION UPDATE

Work at Valve Installation Site to Resume In Independence Boulevard Median

HRSD's contractor has remobilized at the site of a recent valve installation in the median of Independence Boulevard south of Ewell Road to temporarily repair two sections of concrete pipe that developed cracks following completion of that project. After our engineers determine what caused the cracks, the contractor will proceed with the appropriate permanent repair. You can expect to see the insertion of another line stop and bypass piping beginning Tuesday, April 19.

Our contractor and project team will work diligently to minimize inconvenience, but you may again notice noise and increased heavy equipment traffic associated with construction activities.

Nighttime work will be necessary during certain phases of the permanent repair; however, your water and sewer services will not be interrupted by this effort.

We thank you in advance for your understanding.
