

CONSTRUCTION NOTIFICATION UPDATE 2017

Kecoughtan Road Sanitary Sewer Pipeline Replacement Construction

--Work Continues--

HRSD, your regional wastewater treatment utility, is undertaking a project to replace approximately 1,000 linear feet section of sanitary sewer pipeline located along Kecoughtan Road from Ivy Home Road heading south towards Clyde Street. This work is to take place primarily between the hours of **7 a.m. to 5 p.m., Monday through Friday**. This work can be weather and situation dependent. Please see our website for up-to-date construction updates.

**In the upcoming weeks, the contractor will continue installing the sanitary sewer gravity pipeline. The contractor will ensure that access to residences and at least one entrance to businesses will be maintained throughout construction.
This work should not affect your water or sewer services.**

While our contractor and project team works diligently to minimize impacts you may experience typical construction noises such as equipment engines and back-up alarms, materials being delivered, diesel generators and air compressors, sawing and the like should be anticipated.

Please visit the HRSD website, www.hrsd.com, for updated project information. Look for the Construction Status link. Click on Hampton and then the Kecoughtan Road Sanitary Sewer Pipeline Replacement link.
