### Hilton Area Sewer Lining Project – Phase 2

--Lateral Work to Begin--

HRSD, your regional wastewater treatment utility, is undertaking a project to rehabilitate approximately 8,200 linear feet of gravity sewer pipe, identified laterals and manhole frames and covers in the greater Hilton area, originally installed in the 1940s. This work is to take place primarily between the hours of **7 a.m. to 7 p.m.**, **Monday through Friday**. This work is weather and situation dependent.

**In the upcoming weeks, the contractor will begin replacing several previously identified lateral pipes along the project path. These public laterals and cleanout lids, located within the public right of ways, may have flowerbeds and trees planted on or around them and over the years been covered with dirt, grass, and driveways. In these cases, the contractor will need to uncover this area to work and will coordinate with you for this effort and restoration. During the active portion of this work, the contractor will ask that you refrain from heavy use of your water and sewer services. Each lateral replacement is estimated to take 1-3 days to complete over the span of a few months.**

While our contractor and project team works diligently to minimize impacts you may experience some odor, the construction crews and equipment (with back-up safety alarms) noise associated with construction. Please take care when traveling around the construction areas and **be aware of children and families in this school zone and neighborhood.**

Please visit the HRSD website, [www.hrsd.com](http://www.hrsd.com), for updated project information. Look for the Construction Status link. Click on Newport News and then the Sewer Rehabilitation Project: Hilton Area Sewer Lining link.
